PROTECT • HUNT • COMPETE

I hope that 2016 finds you well, and that you've been able to enjoy the outdoors with friends, family and your CZs!

As we looked forward to our new product offerings this year, we turned to all of the great input we've gotten from customers to help guide our developments.

Last year we were very happy to be able to finally bring our Scorpion and Bren semi-autos to the US, and the response from customers was excellent. For 2016 we've made a few changes to those popular pistols, as well as adding 'Carbine' versions with rifle-length barrels and a number of US-made parts.

In recent years, more and more customers have been telling us they want to use a suppressor with our guns, so for 2016 we've introduced an entire line of suppressor-ready CZ pistols, several new threaded rimfires, as well as a threaded 1911 in our Dan Wesson line.

On that Dan Wesson front, we're happy to introduce a handful of new models, from the long-slide hunting 1911 named the Bruin to the reintroduction of a classic—the 715 revolver Pistol Pack. Also, for the many fans of 9mm 1911s, a number of our models now come in a 9mm version.

If you're a clay shooter like I am, you might be interested in the All American Trap Combo—a two-barrel set that combines an adjustable high rib with a flat sporting clays barrel set.

No matter whether you're a hunter, a plinker or a professional, I hope 2016 is a good one for you and yours.

SCORPION/BREN

CZ **SCORPION EVO 3 S1 CARBINE W/ FAUX SUPPRESSOR**

Available in two variants, the Scorpion Carbine is a whole new animal. Building on the lauded submachine gun platform that first hit the US civilian market in pistol form in 2015, the Carbine has a 16.2" barrel fitted with either a compensating muzzle brake or a faux suppressor built specifically for CZ-USA by SilencerCo.

Fit with the factory's folding adjustable stock, the Carbine features a number of US-made parts to make it fully 922(r) compliant. One of the nicest features of the firearm is the newly-designed forend, covered in M-LOK attachment points to keep the profile slim while still big enough to swallow most pistol-caliber suppressors should the owner decide down the road to convert it to an SBR for use with a suppressor.

Low-profile aluminum adjustable sights round out the platform, and a top Picatinny rail allows the mounting of a wide number of optics.

CAL: 9mm Luger **STOCK/FINISH:** Folding/adjustable, Black

MODEL VARIANT:

- CZ **Scorpion EVO 3 S1 Carbine** — Compensating muzzle brake instead of faux suppressor

Scorpion Carbine with muzzle brake

NEW

CZ **805 BREN S1 CARBINE**

For those who would prefer to own a Bren in rifle form without having to jump through all the hoops of converting our pistol version into an SBR, the Bren is now available in carbine form with a 16.2" barrel. Equipped with the factory's folding adjustable stock, it also has a new set of flip-up adjustable iron sights.

Chambered in .223/5.56 and using the ubiquitous STANAG magazine from the AR16/M16, it easily accepts optics and lights on its top and bottom Picatinny rails. An effective two-port muzzle brake helps keep the Bren solidly on target and reduces recoil and muzzle flip.

CAL: .223/5.56x45 **STOCK/FINISH:** Folding/adjustable, black

MODEL VARIANT:

- CZ 805 **Bren S1 Carbine FDE** — Flat Dark Earth receiver, stock, lower and magwell

NEW

CZ **SCORPION EVO 3 S1 PISTOL FDE**

Following in the footsteps of its clad-in-black sibling, the FDE Scorpion hosts all the same features that have made the Scorpion Pistol a hit. With dead-simple blowback operation, the Scorpion will chew through an ammo stash in no time. New for 2016 is a barrel threaded 18x1 to accept the factory flash hider, but also threaded 1/2x28 underneath the flash hider to allow the easy addition of a suppressor or aftermarket muzzle device.

An obvious candidate for those who want to create a Short Barreled Rifle, the factory folding stock goes on quickly and easily, and is sold in a 922(r) compliance kit so that you have all the required parts to stay on the up-and-up.

If submitting for an NFA tax stamp isn't your cup of tea, we also sell an arm brace adapter kit that allows the fitment of aftermarket arm braces or cheek weld devices.

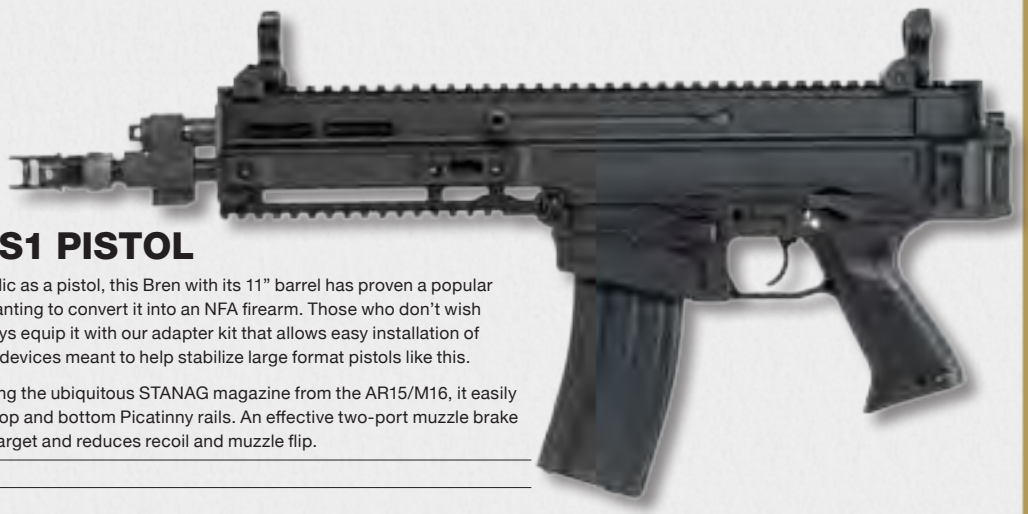
An 11-inch Picatinny rail rides on top, and a superb set of aluminum adjustable sights are fitted from the factory. With four rear aperture sizes, they can be set up for quick acquisition or precision with just a spin of the rear sight.

CAL: 9mm Luger **FINISH:** Flat Dark Earth

MODEL VARIANT:

- CZ **Scorpion EVO 3 S1 Pistol** — Black furniture

NEW



CZ **805 BREN S1 PISTOL**

Imported from the Czech Republic as a pistol, this Bren with its 11" barrel has proven a popular SBR candidate for customers wanting to convert it into an NFA firearm. Those who don't wish to register with the ATF can always equip it with our adapter kit that allows easy installation of aftermarket arm braces or other devices meant to help stabilize large format pistols like this.

Chambered in .223/5.56 and using the ubiquitous STANAG magazine from the AR15/M16, it easily accepts optics and lights on its top and bottom Picatinny rails. An effective two-port muzzle brake helps keep the pistol solidly on target and reduces recoil and muzzle flip.

CAL: .223/5.56x45 **FINISH:** Black

MODEL VARIANT:

- CZ 805 **Bren S1 Pistol FDE** — Flat Dark Earth receiver, lower and magwell

MILITARY/LAW ENFORCEMENT

LE MILITARY ISSUE

CZ **750 SNIPER**

With an effective range of 800 yards, the CZ 750 Sniper is ideal for use by the elite military and law enforcement snipers it was designed for. The synthetic thumbhole sniper-style stock is adjustable for comb height as well as length of pull. The underside of the forend is fitted with a 220mm-long rail that provides multiple attachment points for a bipod.

Two scope-mounting options are available for the 750 Sniper. A Weaver rail comes installed, or by removing the rail, the integrated CZ 19mm dovetail may be used. The 750 features a muzzlebrake, thread protector, mirage shield, two 10-round detachable magazines and its 26" barrel has 4-groove rifling in 1:10" twist.

CAL: .308 Win. (7.62x51 NATO) **STOCK/FINISH:** Black composite tactical/blue

LE MILITARY ISSUE

CZ **805 BREN A2**

The 805 Bren is CZ's answer to the need for a modular and reliable piston-operated selective-fire rifle. It is specifically built to switch between calibers and even magazine systems easily. Removing the barrel/piston system only involves 6 easily accessible screws. Swap out the bolt face, and the rifle can shoot a range of different cartridges.

Its mag well is interchangeable, so popping two pins allows it to convert to other styles of magazine. The 2015 version is set up for the STANAG magazines of the AR-15/M16.

Currently, the Bren comes in A1 (14" barrel) and A2 (11" barrel) configurations with a monolithic 1913 top rail and accessory rails on sides and bottom. Its fixed folding stock can be quickly swapped for a folding, adjustable LOP stock, or it can be removed altogether and replaced with a sling-swivel endcap. The Bren is select fire, with settings for safe, single-shot, two-round burst or full auto.

The 805 is piston-driven with a user-adjustable gas system. Lefty-friendly, the charging handle is reversible and the mag release is ambidextrous.

The 805 Bren is only available on military/law enforcement special-order basis.

CAL: .223/5.56x45 **STOCK/FINISH:** Folding/adjustable, two-tone

MODEL VARIANT:

- CZ 805 **Bren A1** — 14" barrel

LE MILITARY ISSUE

CZ **SCORPION EVO 3 A1**

The CZ Scorpion EVO 3 A1 is a compact submachine gun in 9mm Luger. With a blowback-operated action, the Scorpion can empty its magazine in a hair over 1.5 seconds. Equipped with a folding, adjustable LOP stock, accuracy can be had out to 250 yards. The stock can be removed completely to create a surprisingly controllable machine pistol.

To make the Scorpion user-customizable, the reach to trigger is adjustable for different hand sizes, the charging handle is reversible, and the mag release is ambidextrous.

The EVO's frame and triggerguard assembly are made of a lightweight polymer with monolithic top rail and accessory rails on sides and bottom. Fieldstrip is made simple with a captured pin that allows the removal of the trigger assembly, enabling easy removal of the bolt and all moving parts.

At current date, the Scorpion EVO 3 A1 is only available on military/law enforcement special-order basis.

CAL: 9mm Luger **STOCK/FINISH:** Folding/adjustable, black

optics & bipod not included

CZ **550 H.E.T. II (HIGH ENERGY TACTICAL)**

More than just a facelift, the High Energy Tactical has undergone a full redesign. Starting with a 550 Magnum action from the Czech Republic, our custom gunsmiths in the U.S. sculpt a precision long-range platform guaranteed to shoot sub-MOA. The new H.E.T. II rides in a carbon fiber composite stock from Manners' tactical series, with adjustable cheekpiece and molded-in midnight camo. Industry-standard Accuracy International magazines are secured to the chassis by custom Badger Ordnance bottom metal, and a low-mount Picatinny rail makes fitting optics a breeze. To melt away the .338 Lapua's recoil, a Badger Ordnance FTE muzzlebrake runs point. QD sling flush cups abound.

CAL: .338 Lapua **STOCK/FINISH:** Carbon fiber composite/camoflauge

optics not included

CZ **557 URBAN COUNTER-SNIPER**

Built for compactness, the 557 Urban Counter-Sniper is designed to excel at engaging targets within 400 yards. Chambered in .308 Win., the short 16" barrel only sacrifices 150 fps compared to a standard barrel, and its three-prong flash hider serves as a QD for a suppressor. The carbon fiber composite Manners stock provides a rock-solid platform without weighing the rifle down. The large, detachable box magazine and oversized bolt handle make feeding the rifle easy as can be. QD sling flush cups on the left side make it easy to sling the rifle across the back.

CAL: .308 Win. **STOCK/FINISH:** Carbon fiber composite/black

Handguns

2016 URBAN GREY SUPPRESSOR-READY SERIES

NEW

CZ **P-09 URBAN GREY SUPPRESSOR-READY**

CZ **URBAN GREY SUPPRESSOR-READY** SERIES

In the last few years we've seen a huge spike in requests for suppressor-ready firearms and for 2016 we wanted to more than double our threaded pistol lineup.

Clad in an urban grey color, this limited edition series of pistols has a set of high suppressor sights equipped with tritium lamps front and rear. Extended capacity magazines are used wherever possible, boosting capacities on all but the SP-01 by 2 rounds. This gives the P-09 an impressive 21+1!

Some models, like the P-01 Ω and the 75 Ω are new models in themselves, because of their swappable safety/decocker setup that first debuted on the P-07 and P-09. This allows users to switch from a decocker to a manual safety or vice versa based on their personal preference.

CAL: 9mm Luger **FINISH:** Urban grey

MODEL VARIANTS:
- CZ **P-09 Urban Grey Suppressor-Ready** — 21+1 capacity
- CZ **P-07 Urban Grey Suppressor-Ready** — 17+1 capacity
- CZ **75 SP-01 Tactical Urban Grey Suppressor-Ready** — 18+1 capacity
- CZ **75 B Ω Urban Grey Suppressor-Ready** — 18+1 capacity, swappable safety/decocker
- CZ **75 P-01 Ω Urban Grey Suppressor-Ready** — 16+1 capacity, swappable safety/decocker

CZ **P-07 URBAN GREY SUPPRESSOR-READY**

NEW

COMMON **FEATURES**

- 9mm
- Two extended capacity magazines
- Threaded muzzle (1/2x28)
- Urban Grey coloration
- All Ω (Omega) models have an easily swappable safety/decocker system
- High suppressor sights
- Black rubber grips

CZ **75 SP-01 TACTICAL URBAN GREY SUPPRESSOR-READY**

CZ **75 B Ω URBAN GREY SUPPRESSOR-READY**

CZ **75 P-01 Ω URBAN GREY SUPPRESSOR-READY**

CZ P-09

LE MILITARY ISSUE

CZ **P-09**

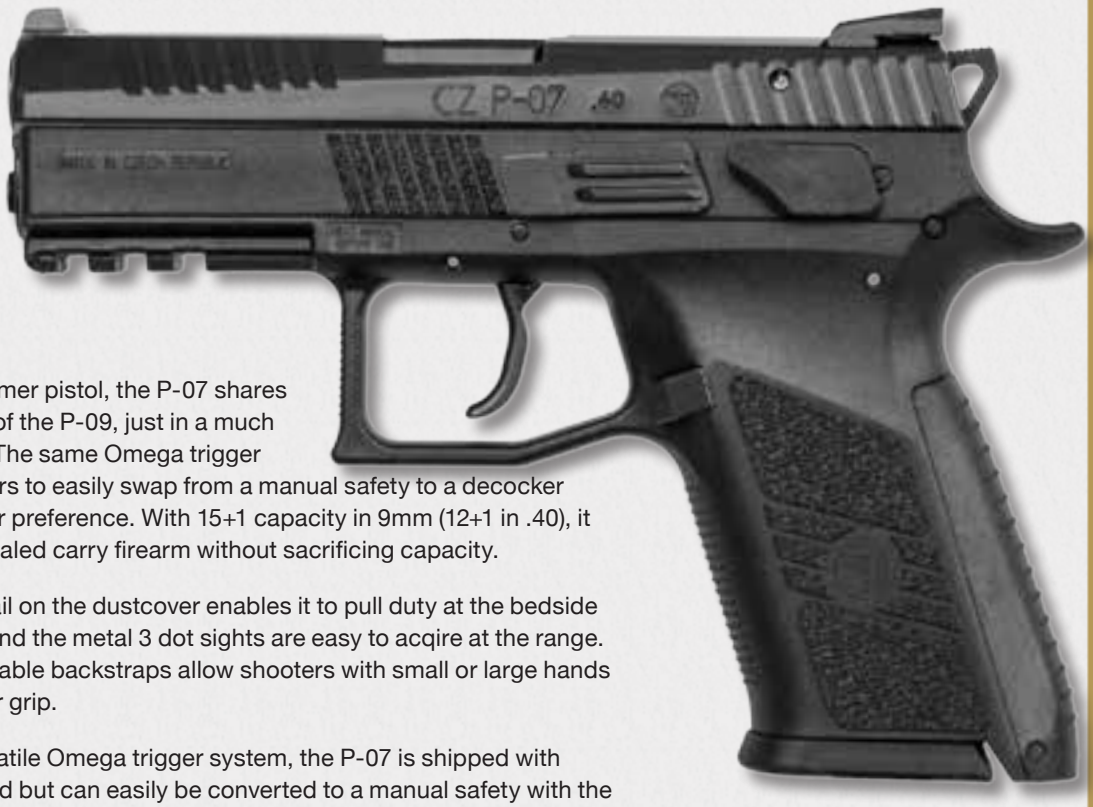
The P-09 is our full-size polymer offering, boasting an impressive 19+1 capacity in its flush-fitting magazine — unsurpassed by any other 9mm service pistol. Featuring the versatile Omega trigger system, the P-09 is shipped with decockers installed but can easily be converted to a manual safety with the supplied parts and instructions. Also included are small, medium and large backstraps that allow users to customize the pistol's grip to their hand while retaining the natural point of aim that CZ handguns are known for. With an integrated 1913 Picatinny rail, the P-09 is readily adaptable to low-light situations. The Omega DA/SA trigger provides a crisp single-action trigger break while providing the safety of a DA first-pull option.

CAL: 9mm Luger **MAGAZINE CAPACITY:** 19 rounds

MODEL VARIANTS:

- CZ **P-09** .40 S&W, 15-round capacity
- CZ **P-09 Suppressor-Ready**, 9mm Luger, barrel threaded 1/2x28

CZ P-07



LE MILITARY ISSUE

CZ **P-07**

Our compact polymer pistol, the P-07 shares all of the features of the P-09, just in a much smaller package. The same Omega trigger system allows users to easily swap from a manual safety to a decocker depending on their preference. With 15+1 capacity in 9mm (12+1 in .40), it makes for a concealed carry firearm without sacrificing capacity.

A Picatinny light rail on the dustcover enables it to pull duty at the bedside with a light/laser and the metal 3 dot sights are easy to acqire at the range. Three interchangeable backstraps allow shooters with small or large hands to tune it to fit their grip.

Featuring the versatile Omega trigger system, the P-07 is shipped with decockers installed but can easily be converted to a manual safety with the supplied parts and instructions.

CAL: 9mm Luger **MAGAZINE CAPACITY:** 15 rounds

MODEL VARIANT:
- CZ **P-07** .40 S&W, 12-round capacity

NEW

CZ **P-07 KADET KIT**

Designed to swap onto current P-07s and older P-07 Duty pistols, the P-07 Kadet Kit enables shooters to train using cheaper (though not as plentiful recently) .22 LR ammo. With a 10-round magazine and fully reciprocating slide, function will be identical to the host pistol in factory form, just with ligther recoil and lower cost associated with its use. Ships with two magazines.

CAL: .22 LR **MAGAZINE CAPACITY:** 10 rounds

FULL-SIZE 75/85

TIMELESS **DESIGN**, **SUPERB** PERFORMANCE

On October 12th, 2007, we built the 1 millionth CZ 75 – a testament to its popularity worldwide. Designed in 1975, the CZ 75 was one of the first 'Wonder Nines,' 9mm pistols that combined high capacity with double action trigger system. With a signature slide-in-frame design, an entire family of pistols has been developed around the CZ 75 design, including compacts, decockers, single-action only, ambidextrous, alloy frames and even competition pistols.

Following a steady rise in popularity within USPSA, results from the 2014 Production Nationals showed that CZ pistols are now used by more competitors than any other brand of pistol. Ergonomics, shootability and reliability of the 75 platform leave the other production pistols wanting.

CZ 75 PLATFORM **COMMON FEATURES**

- High-capacity double-stack magazine
- Hammer-forged barrel
- Ergonomic grip and controls
- Unparalleled accuracy
- Slide-in-frame design for better recoil control
- 3-dot sighting system (tritium night sights available)
- Extended service life due to advanced design and superior materials
- Firing-pin-block safety (on most models)

✓ = CALIFORNIA DOJ APPROVED

CALIFORNIA CERTIFIED

NEW

CZ **75 B Ω CONVERTIBLE**

A further evolution of the 75 B Ω (Omega), the new Convertible version allows users to swap from decocker to safety operation in the same manner as our popular P-07/P-09 pistols. Using the same simplified, more robust variation of the 75's trigger system as the previous Omega, trigger parts use an interlocking design that allows for easy disassembly and reassembly without the need for tools. Not only does this simplify maintenance, the trigger parts themselves are made of different materials to enhance durability, operation life and reliability.

CAL: 9mm Luger **FINISH:** Black polycoat

MODEL VARIANTS:

- CZ **75 B** 9mm Luger — Classic CZ 75 trigger system ✓
- CZ **75 B** .40 S&W — Ambidextrous safety and full-length slide rails ✓
- 75 **BD** 9mm Luger — Decocking lever ✓

CZ **75 B MATTE STAINLESS**

The CZ 75 B Stainless is the first stainless steel firearm to bear the CZ name. With the exception of an ambidextrous manual safety and rubber grips, the stainless version is functionally identical to the CZ 75 B. The biggest difference is an improvement in corrosion resistance, though many will argue there is an improvement in appearance as well.

CAL: 9mm Luger **FINISH:** Matte stainless

MODEL VARIANT:

- CZ **75 B High Polish Stainless**

CZ **85 COMBAT**

The most lefty-friendly pistol in the standard 75 line, the CZ 85 brings ambidextrous controls to the CZ 75 platform. Both the safety and slide stop can be accessed from either side of the pistol, and the magazine release is easily swapped from side to side.

CAL: 9mm Luger **FINISH:** Black polycoat

MODEL VARIANT:

- CZ **85 B 9**mm Luger — Firing pin block safety, standard trigger and 3 dot sights

FULL-SIZE SP-01

CZ **75 SP-01** ✓

Featuring an integral 1913 accessory rail on the dustcover, rubber grip panels and CZ's corrosion-resistant black polycoat finish, the SP-01 is one of the most popular of all of the pistols based on the CZ 75 platform. Borrowing from the improved grip geometry of the compact P-01, the SP-01 utilizes an extended beavertail to protect the shooter's strong hand as well as allowing for a deeper and more secure grip. The grip geometry, checkering in key areas on the front- and backstraps, and redistribution of mass provided by the accessory rail noticeably decrease the perceived recoil from standard 75 models and allow for more rapid target acquisition and transition.

The SP-01 was designed as a military and law enforcement duty sidearm and is currently in use by security forces fighting in the Global War on Terror. Thanks to its exceptional accuracy and superior handling characteristics, the CZ 75 SP-01 has also found a following in the field of sport and target shooting. Its list of users on the competition circuit include world champions Adam Tyc and Angus Hobdell (1st and 3rd place, respectively, in 2005's IPSC championship, World Shoot XIV).

CAL: 9mm Luger **FINISH:** Black polycoat

MODEL VARIANTS:

- CZ **75 SP-01 Tactical** 9mm — Ambidextrous decocking levers
- CZ **75 SP-01 Tactical** .40 S&W — Ambidextrous decocking levers

KADET **ADAPTER**

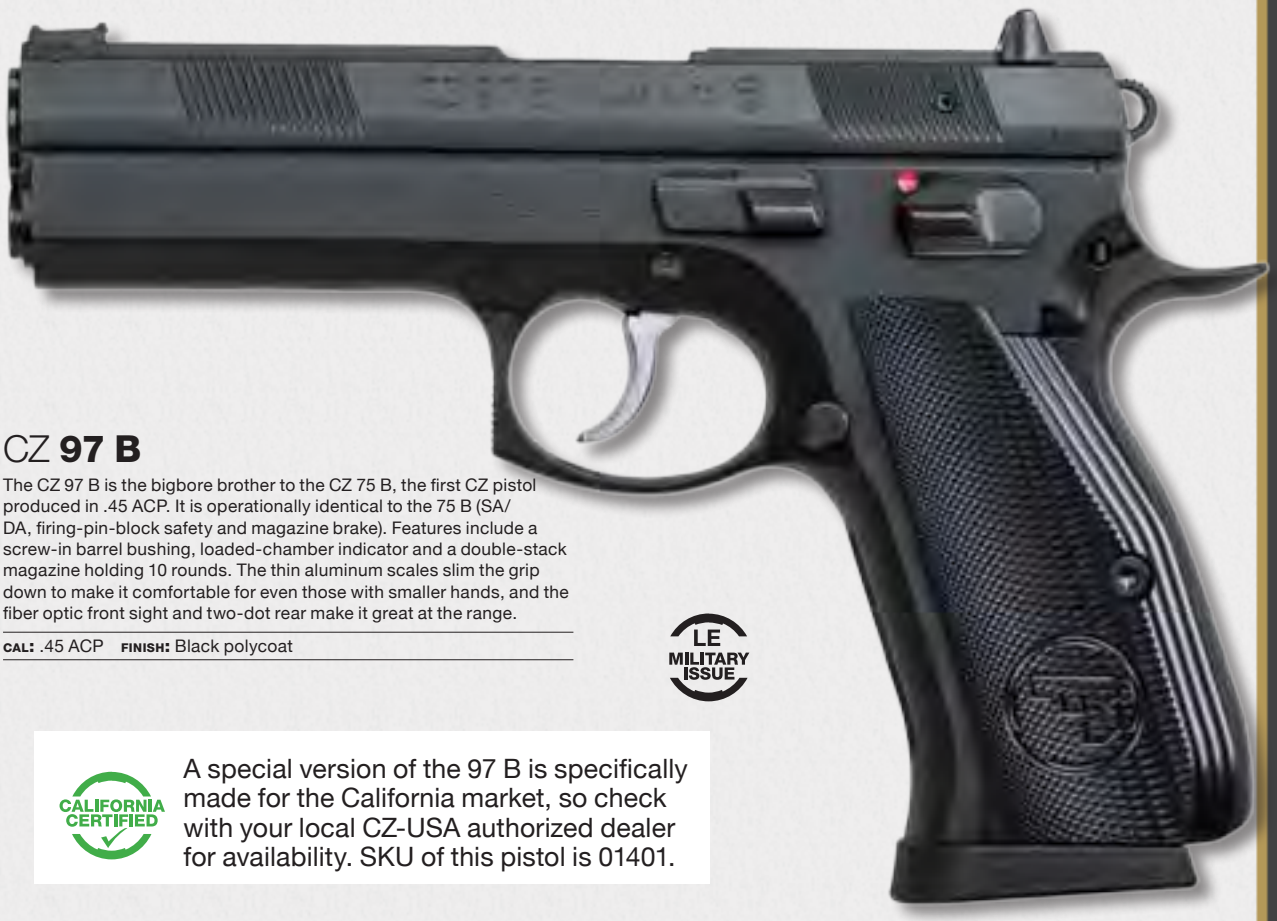
The CZ 75 Kadet conversion kit is a separate accessory for the CZ 75/85 pistol series allowing the firing of .22 LR-caliber cartridges.

The CZ 75 fitted with the Kadet .22 LR conversion is the perfect training or plinking pistol, with the slide weighted and balanced just like the CZ 75. Like its centerfire counterpart, the CZ 75 Kadet is an all-steel model complete with adjustable sights.

Included are two 10-round magazines that fit flush with the grips of the full-size CZ 75 and SP-01 models. The Kadet conversion kit will work on the CZ 75 compact models including the P-01, P-06 and PCR, but the full-size magazines will extend below the bottom of the compact grips of these models. The Kadet conversion will not work on the 97, 75 TS or any polymer models. The P-01, PCR, P-06 and steel Compact in .40 require a PCR slide stop. On 85s, the Kadet slide stop will not work; the factory 85 stop must be used, which won't allow for last-round hold-open.

CAL: .22 LR **MAGAZINE CAPACITY:** 10 rounds

FULL-SIZE .45 ACP



CZ **97 B**

The CZ 97 B is the bigbore brother to the CZ 75 B, the first CZ pistol produced in .45 ACP. It is operationally identical to the 75 B (SA/DA, firing-pin-block safety and magazine brake). Features include a screw-in barrel bushing, loaded-chamber indicator and a double-stack magazine holding 10 rounds. The thin aluminum scales slim the grip down to make it comfortable for even those with smaller hands, and the fiber optic front sight and two-dot rear make it great at the range.

CAL: .45 ACP **FINISH:** Black polycoat

LE MILITARY ISSUE

CALIFORNIA CERTIFIED

A special version of the 97 B is specifically made for the California market, so check with your local CZ-USA authorized dealer for availability. SKU of this pistol is 01401.

CZ **97 BD**

Just as the standard 75 has a decocker variant, so does the 97. For those who prefer the heavy double action first pull, the BD model adds a manual decocker to help drop the hammer to half-cock.

The 97 BD shares many of the features of the B model, including its hardy black polycoat finish and thin aluminum checkered grips. Besides the decocker, the BD also adds a set of 3-dot tritium night sights.

CAL: .45 ACP **FINISH:** Black polycoat

COMPACT

CZ **75 COMPACT** ✓

CALIFORNIA CERTIFIED

At 5" tall with a barrel length of just under 4", the compact model shaves a little more than ¾" off the length and about ½" off the height of the full-size CZ 75. This reduced size allows it to readily disappear under regular clothing, while the steel frame still makes it comfortable to shoot for extended sessions at the range. Equipped with a manual safety, it is able to be carried cocked and locked, or manually decocked for a double action first pull and SA thereafter.

CAL: 9mm Luger **FINISH:** Black polycoat

CZ **75 P-01 Ω CONVERTIBLE**

NEW

Incorporating our swappable Ω (Omega) trigger system, the P-01 Ω can be converted from decocker to safety operation with minimal tools. Using the same simplified, more robust variation of the 75's trigger system as previous Omega models, trigger parts use an interlocking design that allows for easy disassembly and reassembly without the need for tools. Not only does this simplify maintenance, the trigger parts themselves are made of different materials to enhance durability, operation life and reliability.

The P-01 platform was designed for LE and military duty, but its compact size and the reduced weight due to the forged alloy frame made it ideal for discrete carry as well. Its aircraft aluminum 7075 frame sheds weight, while the dust cover-mounted rail allows a user to add a light or laser.

CAL: 9mm Luger **FINISH:** Black polycoat

MODEL VARIANTS:

- CZ **75 P-01** — 9mm Luger, decocker only, standard 75 trigger system ✓
- CZ **75 P-06** — .40 S&W, decocker only, standard 75 trigger system, extended magazine base

CZ **75 D PCR** ✓

Thanks to its forged 7075 aluminum frame, the PCR weighs a full ¼ pound lighter than the 75 Compact, making it more comfortable for everyday carry. Equipped with a decocking lever, it is designed to be decocked before holstering. After decocking, the trigger safety is much like that of a double-action revolver. While there is no need to flip a safety lever off, the relatively longer and heavier trigger pull for the first round requires a conscious decision to pull the trigger before firing. Other additions to the PCR include rubber grip panels, serrated front- and backstraps for improved handling, low-drag sights and a loaded-chamber indicator.

CAL: 9mm Luger **FINISH:** Black polycoat

LE MILITARY ISSUE

CALIFORNIA CERTIFIED

SUB-COMPACT

CZ **2075 RAMI B** ✓

With a 3" barrel and an unloaded weight of less than 26 ounces, the black polycoat, alloy-framed RAMI is ideal for concealed carry.

Based on the proven CZ 75 line of pistols, the RAMI is double action/single action, allowing it to be carried in different conditions depending on the shooter's preferences.

Incorporating the CZ double-stack magazine design, the little RAMI ships with a 10-round flush-mount magazine and 14-round extended magazine in the 9mm Luger version, or 7- and 9-round magazines in .40 S&W. A low-capacity-compliant version of the 9mm is available with two 10-round magazines.

CAL: 9mm Luger **FINISH:** Black polycoat

- CZ **2075 RAMI B** .40 S&W ✓
- CZ **2075 RAMI BD** — 9mm Luger, decocking lever instead of safety

BUILT BY THE CZ CUSTOM SHOP

Photos by www.liveshots.net

When it comes to tuned competition CZs, there's no one who builds more of them each year than Angus Hobdell, owner of CZ Custom. Angus has been building pistols for us for the better part of a decade, with his shop becoming the de facto CZ-USA custom pistol shop. Each year we partner with him to build a handful of models that combine the best parts available to meet the varying needs and budgets of competitive shooters. Check out CZ Custom at czcustom.com.

CZ **75 SP-01 SHADOW TARGET II**

The Target II is a competition-ready pre-B-style SP-01 Shadow, featuring a CZ Custom trigger job with the new short-reset single-action trigger, fully adjustable rear sight, fiber optic front sight, stainless steel guide rod, lighter springs for competition (11-lb recoil and 13-lb main springs), extended magazine release, drop-free magazines and checkered aluminum grips. It was created by champion shooter Angus Hobdell's CZ Custom Shop to have trigger pulls of 3 to 4 lbs in SA and 7.5 to 8.5 lbs in DA.

CAL: 9mm Luger **FINISH:** Black polycoat

CZ **75 SHADOW TAC II**

Our latest custom shop model, this defensive pistol has a tuned trigger system with a shorter single-action reset and a pre-B-style slide. The Tac II features a CZ Custom plain black serrated Combat II rear sight, Trijicon® tritium front sight, factory 85 Combat trigger, is sprung lighter (14-lb recoil and a 13-lb main springs), extended magazine release, drop-free magazines and a stainless steel guide rod. The resulting trigger pull is 3 to 4 lbs in SA and 7.5 to 8.5 lbs in DA. Features are rounded out with a short dustcover, high-rise beavertail and checkered aluminum grips.

CAL: 9mm Luger **FINISH:** Black polycoat

CZ **75 COMPACT SDP**

Starting with the lightweight P-01, Angus' crew installs a competition hammer modified to work with the decocker, polishes and smoothes the firing-pin block, and tunes the trigger to 3 to 4 lbs in SA and 7.5 to 8.5 lbs in DA. Riding atop the slide are tritium sights with a Heinie® Slant Pro in the rear for a snag-free profile. Custom interior parts such as a CZC 85 combat trigger, solid firing-pin stop and trigger pin, extended firing pin and a stainless steel guide rod complete the package.

CAL: 9mm Luger **FINISH:** Black polycoat

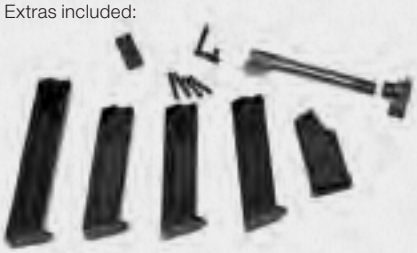
CZ **CZECHMATE**

The Czechmate is based on a modified version of the CZ 75 TS frame. It comes with all parts necessary to run in IPSC Open or Limited division (both in 9mm). The Czechmate comes configured for Open division competition with a compensator and C-MORE® red dot sight installed.

A spare barrel is included along with a front sight adapter that replaces the compensator and a rear sight to replace the slide racker handle when switching from Open to Limited configuration. A big stick 26-round magazine and three 20-round magazines are included in the CZ hardcase.

CAL: 9mm Luger **FINISH:** Black polycoat

Extras included:



NEW

CZ **75 TACTICAL SPORT ORANGE**

Turning the Tactical Sport up a notch, the Orange borrows a number of design features from the Czechmate and incorporates a few of its own. With the slimmer trigger guard, revised grip geometry and finer checkering from the Czechmate frame, it adds a thumb stop and fully adjustable target sights.

With the same long slide and full-length dust cover as the standard TS, it also shares the single-action-only trigger, giving it an incredibly light pull and short reset, making it a joy to shoot at the range and deadly in competition.

CAL: 9mm Luger **FINISH:** Black polycoat, orange grips/mag bases

MODEL VARIANT:

- CZ **75 Tactical Sport Orange** .40 S&W

CZ **75 TACTICAL SPORT** ✓

Introduced in 2005, the CZ 75 Tactical Sport is a competition-ready pistol designed for IPSC standard division (USPSA® limited division). The weight and balance of the CZ 75 TS are optimized for the rapid yet accurate shooting necessary for success in practical shooting disciplines. An evolution of the proven CZ 75 Standard IPSC, the TS retains all of the best features of its predecessor and brings increased durability, new sights, a new trigger system and more.

The TS features a full-length dustcover, a 5.4" barrel (0.7" longer than the CZ 75 B) as well as a slightly larger grip to accommodate the higher-capacity heavy-duty magazine. Other features include a fixed rear sight, ambidextrous safety, extended magazine release, SA trigger, checkered front and rear strap, and a gaping magazine well for fast magazine changes.

CAL: 9mm Luger **FINISH:** Dual tone (Silver Polycoat frame/blue slide)

CZ **75 B SA** ✓

Built around the standard 75 platform, the 75 B SA leaves the factory ready to compete. With a single action only trigger system, pull is light and crisp out of the box. Oversized ambidextrous safeties and a reversible mag release allows entry for left or right-handed shooters.

Shipping with 2 16-round magazines, it uses the standard CZ 75 magazine, meaning it can use SP-01 18+1 mags and extended capacity 26-round mags if desired.

DAN WESSON FIREARMS

FEATURES

- Hand-fit 70-series frame and slide
- Forged slides and barrels
- Hand-fit match barrels
- Billet alloy steel fire-control system
- Zero MIM parts
- All premium components
- Lowered and flared ejection port
- Beveled magazine well
- Carry bevel treatment
- Undercut triggerguards
- Hand-polished flats
- Crisp 4-lb. trigger job out of the box
- Two magazines
- Signature-series case
- Barrel bushing wrench
- Cable lock and manual

Dan Wesson has long been known for quality, durability and ingenuity with our revolvers. Today, we bring the same attention to detail to our 1911s. With over a decade of 1911 production, we've perfected the craft.

We produce only a few thousand handguns a year, using the best components and finishes the industry has to offer. We painstakingly hand-fit and polish each and every part, creating the best possible production 1911. Even a custom pistol maker would be hard-pressed to build a gun that would outperform ours straight out of the box. No matter the model, from our entry-level Heritage to our flagship Valor, we are proud to provide our customers the "Best Bang for the Buck" in the industry.

All our pistols share the same match-grade components, but specific features vary by model. All of our black guns start out in stainless and are coated in our Duty finish, a revolutionary treatment process that actually bonds to the components and creates a super-durable matte-black skin. Our Duty finish beats any of the spray-and-bake finishes most companies use today, hands down. Our durability testing proves it, and our customers love it — which is proof enough for us!

On the off chance you might need to speak to customer service, our knowledgeable and courteous service department is second to none. We invite you to find another production 1911 in our price range that gives you everything Dan Wesson has to offer.

NEW

DW **BRUIN**

With more folks than ever choosing to hunt with a handgun and the continuing resurgence of the 10mm cartridge, we decided it was time to bring the heat. Our first long-slide 1911, the Bruin was born to hunt. The long slide means a long sight radius and the 6" barrel within allows full-power 10mm loads as much time as possible to use their powder charge. Fully adjustable tritium sights ensure that when shooting hours arrive, you'll be able to see the sights. Not only that, but we're using a tritium/fiber-optic combo front sight to make sure the front glows day or night.

CAL: 10mm **FINISH:** Two-tone Black/Bronze Duty finish

MODEL VARIANT:

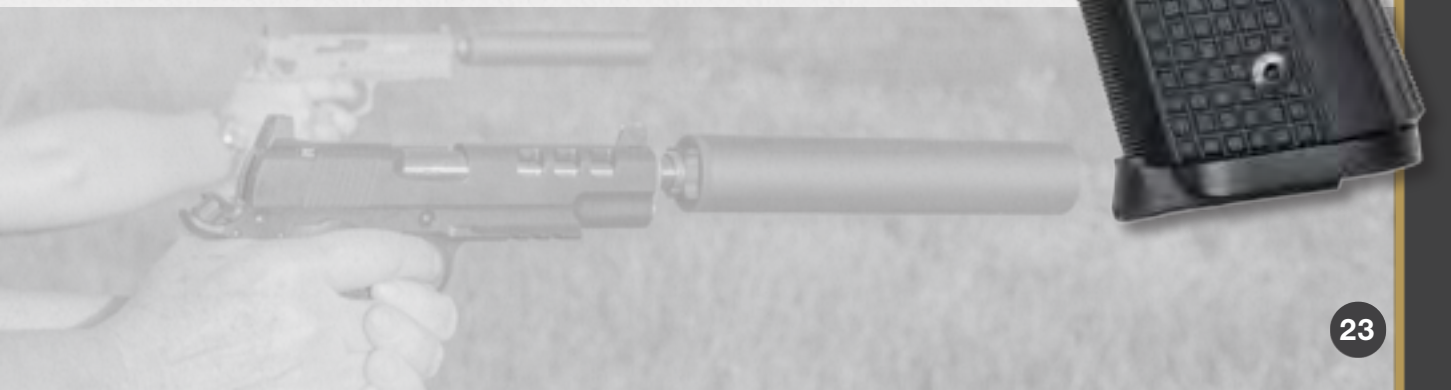
- DW **Bruin Black** — 10mm or .45 ACP, hard black Duty finish, red/black G10 grips

NEW

DW **DISCRETION**

With suppressors becoming more and more mainstream, the Discretion's match-grade stainless barrel is extended and threaded to make it a ready host. Its aggressively-ported slide, serrated trigger and competition-inspired hammer give it a look all of its own, making it stand out in our line of 1911s. High tritium sights allow for sighting over the top of most pistol suppressors, with a rear designed so that the slide can be racked on a belt if using the pistol one-handed.

CAL: 9mm Luger, .45 ACP **FINISH:** Black Duty finish



DAN WESSON

Now available in 9mm!

DW **VALOR**

The Valor series is our flagship line, meaning it is the best we have to offer. Frankly, we feel it is the best-built production 1911 on the market.

The Valor series features a forged frame with 25-LPI checkering front and back, an undercut triggerguard, tactical night sights, VZ® slim-line G10 grips, as well as our tool-steel fire controls and other premium small parts. Every piece that goes into the Valor series is hand fit, polished and blended to provide you with not only the best-functioning gun we can provide but also the best looking. The Valor can be finished in either a matte glass bead stainless or our super-durable black Duty finish.

We set out to deliver the ultimate defensive 1911, and the Valor is exactly that. It delivers everything you need and nothing you don't.

CAL: 9mm Luger, .45 ACP **FINISH:** Matte stainless finish

MODEL VARIANT:

- DW **Valor Black** — hard black Duty finish, double diamond black/gray G10 grips

NEW

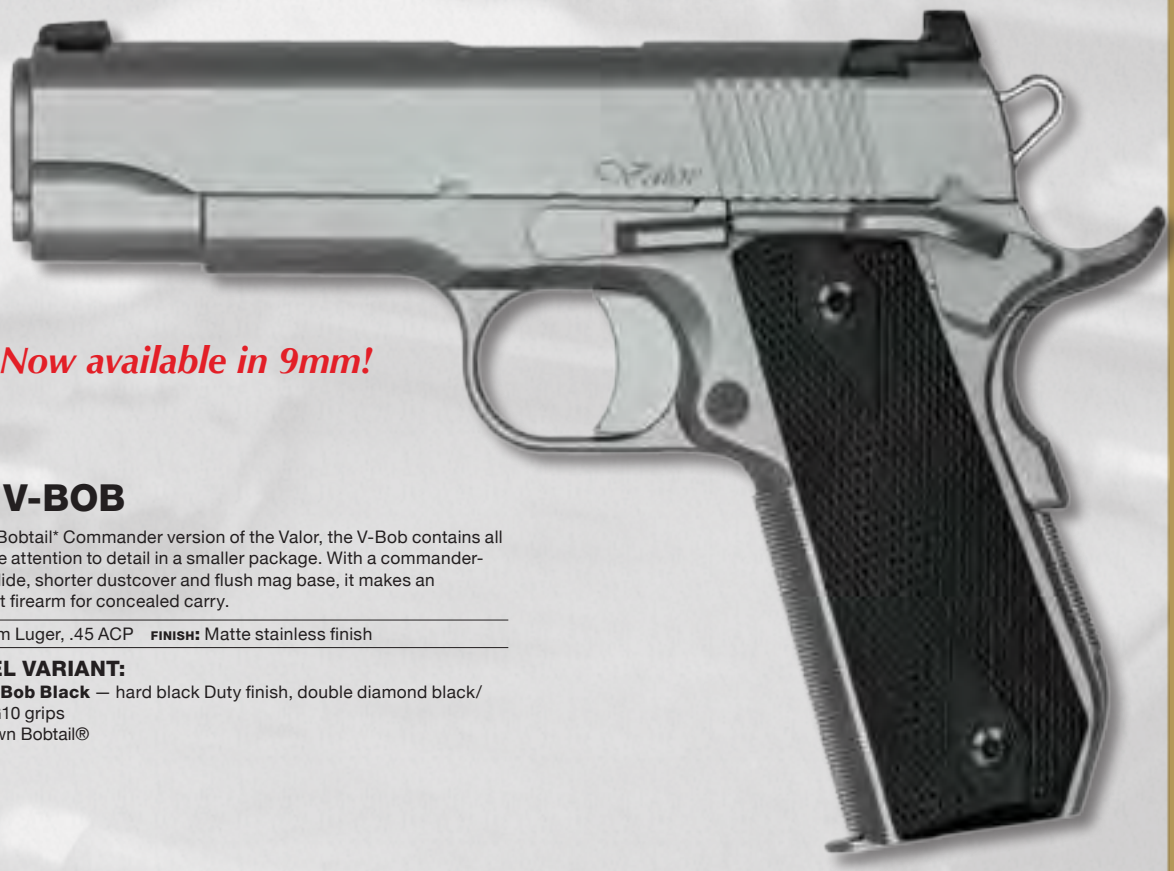
DW **VALOR COMMANDER**

We've seen a steady increase in the number of requests we get for a non-bobbed Valor Commander, so for 2016 it rounds out our Valor series. What sets the Valors apart from the rest of our 1911 lineup is the sheer amount of time spent hand-polishing, hand-fitting and finishing. Not only do they get the best quality parts, they get the most individual attention of any model we make.

CAL: 9mm Luger, .45 ACP **FINISH:** Black Duty finish

MODEL VARIANT:

- DW **Valor Commander Stainless** — matte stainless finish, black G10 grips



Now available in 9mm!

DW **V-BOB**

A 4.25" Bobtail* Commander version of the Valor, the V-Bob contains all the same attention to detail in a smaller package. With a commander-length slide, shorter dustcover and flush mag base, it makes an excellent firearm for concealed carry.

CAL: 9mm Luger, .45 ACP **FINISH:** Matte stainless finish

MODEL VARIANT:

- DW **V-Bob Black** — hard black Duty finish, double diamond black/gray G10 grips

*Ed Brown Bobtail®

Now available in 9mm!

DW **SILVERBACK**

The Silverback's stainless slide has polished flats, adjustable target-style tritium sights, a serrated top rib and ball cuts on the dustcover, while its stainless frame is finished in our Duty black nitride finish and completed with G10 full-thickness grips.

Time spent hand-fitting, polishing and finishing of the Silverback is on par with our cream-of-the-crop Valor series, and we think the resulting pistols are of higher quality than any other production 1911 on the market.

CAL: 9mm Luger, 10mm Auto, .45 ACP **FINISH:** Stainless steel/black Duty finish

DAN WESSON

DW **POINTMAN NINE PM-9**

The Pointman series has been offered in limited quantities in the past, and demand always outpaces production capacity. Featuring our serrated rib on top of the forged slide, it has an adjustable target sight in the rear and fiber optic sight in the front, and front and rear cocking serrations. The frame is forged stainless with an undercut triggerguard and 25-LPI frontstrap checkering. The flats are polished to a soft brushed finish, and the rounds are sandblasted for a nice contrast. Double diamond cocobolo grips finish it off. With the lower cost of 9mm ammunition and mild recoil, this is the perfect model for getting acquainted with the 1911. Holding 9+1 rounds, the PM-9 shines both at the range and in competition.

CAL: 9mm Luger **FINISH:** Brushed/bead blasted stainless

MODEL VARIANT:

- DW **Pointman 38 PM-38** .38 Super NEW
- DW **Pointman Seven PM-7** .45 ACP, standard front sight ✓

LE MILITARY ISSUE

Now available in 9mm!

DW **SPECIALIST**

The Specialist is one of the newer additions to the Dan Wesson stable. When police departments approached us to build a more reliable, durable 1911 to replace the ones they had been carrying, we developed a model just for them. The additions that made it ideal for law enforcement also made it perfect for home defense, so we gladly offered it for sale to the public.

A full-size 1911, the Specialist is chambered in .45 ACP and loaded with features to satisfy a public servant's special requirements. The forged stainless steel slide wears our popular Clark-style serrated rib with a single amber tritium dot in the rear sight and a green lamp with white target ring in front.

The frame sports an integral 1913 Picatinny rail, 25-LPI frontstrap checkering, undercut triggerguard and recessed slide stop to enable the installation of laser grips. Equipped with an ambidextrous thumb safety, extended magazine release and detachable two-piece mag well, the Specialist is operator-friendly. It is finished off with a set of G10 grips that guide the hand into the beavertail and hold it there. The Specialist ships with two 8-round magazines with bump pads and is available in either a matte stainless finish or our black Duty finish, which makes for an especially hardy pistol that scoffs at everyday wear and tear.

CAL: 9mm, .45 ACP **FINISH:** Matte stainless steel

MODEL VARIANT:

- DW **Specialist Black** — 9mm or .45, Black Duty finish

DW **RAZORBACK RZ-10**

Our Razorback has always been our most popular 10mm platform. The RZ-10 is a 5" 1911 and features the serrated target rib machined on the top of the slide with fixed defensive sights. We fit a match-grade, ramped barrel for use of the most popular 10mm loads and smoother feeding. The slide is mated to our standard forged frame with undercut triggerguard and smooth frontstrap. On both the frame and the slide, we polish the flats to a soft brushed finish and sandblast the rounds. The gun is finished off with a nice set of double diamond cocobolo grips. Chambered in the powerful 10mm cartridge, the RZ-10 is a very versatile 1911 package suitable for defensive use, target shooting and handgun hunting of medium-sized game up to deer or wild boar.

CAL: 10mm **FINISH:** Brushed/bead blasted stainless

DW **HERITAGE RZ-45**

The Heritage is our entry-level 1911, allowing shooters to experience Dan Wesson quality at the most affordable price possible. Even though this model is our most economical, it features all the same quality components that we use in our 1911 models. A Government-size model, it has a 5" barrel and is chambered in .45 ACP. The slide features our serrated rib and wears a tritium front sight and plain black, snag-free rear. The sides of the slide have a nice brushed polish on the flats, while the rounds are sandblasted to match the matte forged frame with undercut triggerguard and smooth frontstrap. Grips are rubber Double Diamonds by Hogue®. The Heritage is a great introduction to the Dan Wesson 1911 experience, and we are confident it will become an heirloom, handed down from generation to generation.

CAL: .45 ACP **FINISH:** Brushed/bead blasted stainless

DW **GUARDIAN**

We've had many requests to produce a Commander-sized 1911 in 9mm. In response, we've revived one of the early Dan Wesson 1911 models with a twist… We have combined the best features from two of our most popular models, the Bobtail* Commander and the CCO. The new Guardian has an anodized aluminum bobtail frame and an aluminum mainspring housing to help reduce printing when carrying concealed and make it comfortable enough for full-time carry. The black Duty-finished, Commander-length slide and alloy frame give it just the right feel and balance. If you are looking for a lightweight, Commander-sized 1911 in 9mm, .38 Super or .45 ACP, don't pass up the Guardian.

* Ed Brown Bobtail®

CAL: 9mm Luger, .38 Super, .45 ACP **FINISH:** Black Duty finish/black anodized

CALIFORNIA CERTIFIED

DW **COMMANDER CLASSIC BOBTAIL** ✓

Produced only in small numbers in recent years, a resurgence in demand means we brought the Commander Classic Bobtail back into regular production. One of the few California-legal models in our 1911 line, it has a loyal and growing following in the Sunshine State. With stainless steel slide and frame, its flats are brushed and rounds are bead blasted. With nag-free Trigium sights and a bobbed mainspring housing, it's an excellent candidate for concealed carry.

* Ed Brown Bobtail®

CAL: .45 ACP **FINISH:** Brushed/bead blasted stainless

NEW

DW **VALKYRIE COMMANDER**

Sharing the features that make the Valkyrie one of our most popular CCW 1911s, the Valkyrie Commander simply adds an aluminum Commander-length frame, making it ideal for folks who need a bit more purchase than an Officer-size frame allows.

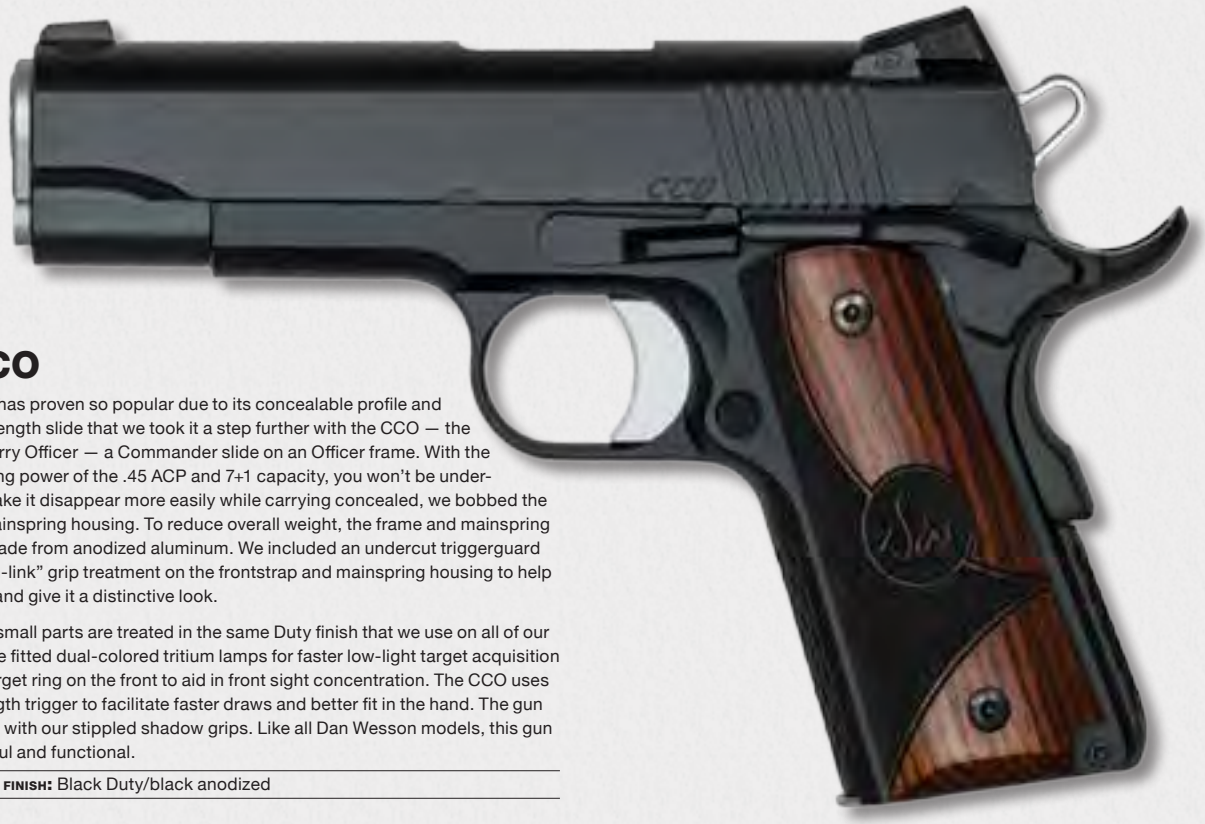
CAL: 9mm Luger, .45 ACP **FINISH:** Black Duty finish/black anodized

Now available in 9mm!

DW **VALKYRIE**

The Valkyrie is a variation on the CCO (Commander-length slide on an Officer frame). This gun features all the latest upgrades to the CCO platform including our ECO frame with a recessed slide stop hole paired with ball cuts on the slide's dustcover and carry cuts up front. Along with slim G10 grips, it utilizes the same sights and controls of the Dan Wesson ECO with the barrel and bushing of the Dan Wesson CCO.

CAL: 9mm Luger, .45 ACP **FINISH:** Black Duty finish/black anodized

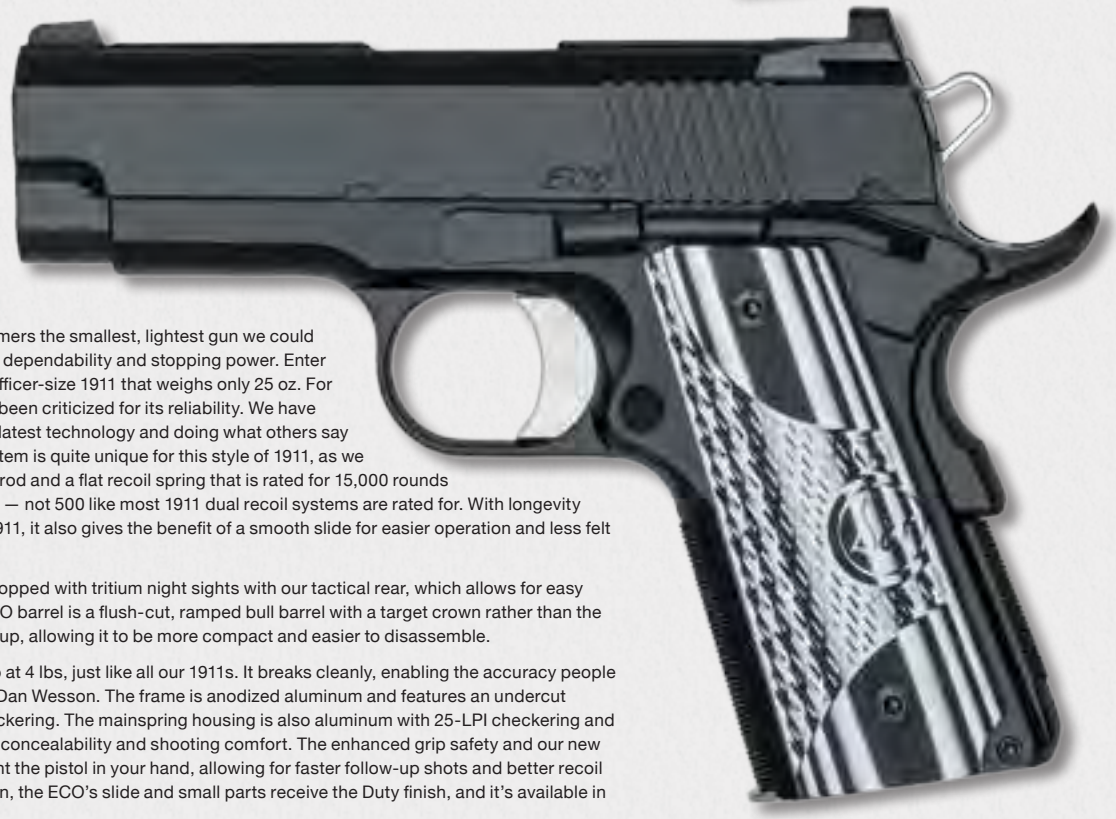


DW **CCO**

Our Guardian has proven so popular due to its concealable profile and Commander-length slide that we took it a step further with the CCO — the Concealed Carry Officer — a Commander slide on an Officer frame. With the proven stopping power of the .45 ACP and 7+1 capacity, you won't be under-gunned. To make it disappear more easily while carrying concealed, we bobbed the back of the mainspring housing. To reduce overall weight, the frame and mainspring housing are made from anodized aluminum. We included an undercut triggerguard and our "chain-link" grip treatment on the frontstrap and mainspring housing to help control recoil and give it a distinctive look.

The slide and small parts are treated in the same Duty finish that we use on all of our black guns. We fitted dual-colored tritium lamps for faster low-light target acquisition and a white target ring on the front to aid in front sight concentration. The CCO uses a medium-length trigger to facilitate faster draws and better fit in the hand. The gun is rounded out with our stippled shadow grips. Like all Dan Wesson models, this gun is both beautiful and functional.

CAL: .45 ACP **FINISH:** Black Duty/black anodized



DW **ECO**

We wanted to give our customers the smallest, lightest gun we could without sacrificing accuracy, dependability and stopping power. Enter the ECO — a single-stack, Officer-size 1911 that weighs only 25 oz. For years, the Officer model has been criticized for its reliability. We have conquered that by using the latest technology and doing what others say can't be done. The recoil system is quite unique for this style of 1911, as we use a solid, one-piece guide rod and a flat recoil spring that is rated for 15,000 rounds in .45 ACP — 15,000 rounds! — not 500 like most 1911 dual recoil systems are rated for. With longevity unheard of in a production 1911, it also gives the benefit of a smooth slide for easier operation and less felt recoil.

The lightweight 3.5" slide is topped with tritium night sights with our tactical rear, which allows for easy one-handed racking. The ECO barrel is a flush-cut, ramped bull barrel with a target crown rather than the traditional barrel bushing setup, allowing it to be more compact and easier to disassemble.

Trigger pull is short and crisp at 4 lbs, just like all our 1911s. It breaks cleanly, enabling the accuracy people have come to expect from a Dan Wesson. The frame is anodized aluminum and features an undercut triggerguard and 25-LPI checkering. The mainspring housing is also aluminum with 25-LPI checkering and a rounded bottom corner for concealability and shooting comfort. The enhanced grip safety and our new slim-line G10 grips really plant the pistol in your hand, allowing for faster follow-up shots and better recoil control. Just like the Guardian, the ECO's slide and small parts receive the Duty finish, and it's available in both 9mm and .45 ACP.

We set out to conquer the Officer model and did just that. The ECO is compact, extremely lightweight and raises the bar for reliability. Pick up an ECO — you won't be disappointed.

CAL: 9mm Luger, .45 ACP **FINISH:** Black Duty/black anodized

NEW

DAN WESSON 715 PISTOL PACK

The 715 is as it was before — designed and built to be the most accurate, rugged and versatile revolver on the market. Famous for its swappable barrels, 2016 sees the revival of the Pistol Pack. Shipped with 4", 6" and 8" barrel/shroud assemblies in the modern heavy vent shroud profile, the weight of which tames the recoil of the .357 Magnum very well.

The double-action trigger is short and relatively light, while the single action is light and crisp. The target-like SA trigger pull made the Dan Wesson revolver a favorite among competitors and hunters, and the tradition continues in the 715.

Like it's famous predecessors, barrel assemblies and grips are easily swapped by the shooter, and the 715 accepts grips and barrel/shroud assemblies from 15-2 model and newer revolvers.

The original Dan Wesson revolver improved on the accuracy and service life of the traditional double-action revolver design in a few ways. The tensioned barrel of the DW interchangeable barrel system enhances accuracy, pulling the barrel tight like a guitar string, enabling it to vibrate at the same frequency every time.

The forward crane latch, located in front of the cylinder and paired with a rear ball detent, helps to ensure proper cylinder/barrel alignment during firing. Superior to the rear locking designs of other revolvers, it adds to the accuracy of the 715.

While the tensioned barrel definitely improves accuracy over other revolvers, it's the consistent cylinder/barrel alignment that contributes most to the accuracy of the design.

Additionally, the clockwise-rotating cylinder reduces stress on the crane, since it turns in the same direction the crane locks, prolonging service life and keeping everything tight. The 715's frame is robust, built to handle the heaviest of factory loads.

Each Pistol Pack is shipped in a custom Dan Wesson hardcase with compartments for the additional barrel assemblies and a factory-supplied barrel wrench kit.

CAL: .357 Magnum/.38 Special **FINISH:** Brushed Stainless

MODEL VARIANT:

- DW **715** 6" barrel only

DAN WESSON ELITE SERIES

DW **CHAOS**

This double-stack 9mm is for competitors who don't have to worry about a power factor requirement such as in 3-Gun. Built to tackle the rigors of the sport, the Chaos has 21+1 rounds on tap. Like all of our Elite Series Dan Wessons, it is hand built on a double-stack 1911 frame and tuned to perfection. With high capacity, a superbly crisp trigger and flawless reliability, the Chaos truly does reign supreme.

CAL: 9mm Luger **FINISH:** Matte black

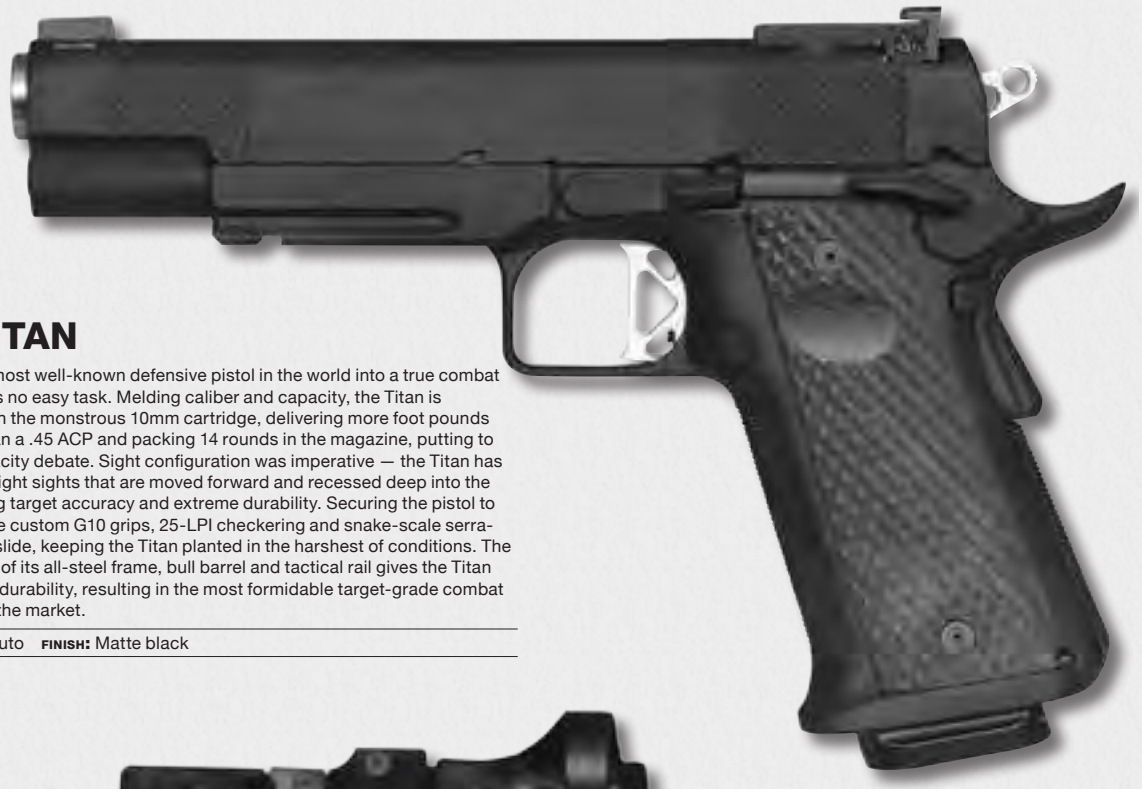
DW **MAYHEM**

Built for the Limited IPSC/USPSA® division as well as anyone after a superbly accurate target-grade 1911, the Mayhem is ready to shake things up. Built on our high-capacity steel 1911 frame, we've shaved weight from where you don't want it and added it to where you do. The 6" bull barrel and tactical rail add static "good weight." The 6"-long slide gives an edge on sight radius and pointability but is lightened to equal the weight of a 5". The result speaks volumes, with a gun that balances and feels like a Government-size model but points and shoots like a long-slide. The all-steel frame and industry-leading parts deliver the most well-balanced, softest-shooting 6" Limited gun on the market.

CAL: .40 S&W **FINISH:** Matte black

DAN WESSON
ELITE SERIES

The Elite Series of 1911s are designed to meet and exceed the expectations of the most demanding competitive and combat shooters. Each model in the Elite line was purpose-built knowing the demands that are placed on these handguns. Every part and component was carefully chosen based on supreme quality and thorough testing. Each is meticulously hand fit, followed by a rigorous function and reliability regimen. What you get are handguns of unparalleled accuracy, rugged reliability and flawless functionality.



DW **TITAN**

Turning the most well-known defensive pistol in the world into a true combat handgun was no easy task. Melding caliber and capacity, the Titan is chambered in the monstrous 10mm cartridge, delivering more foot pounds of energy than a .45 ACP and packing 14 rounds in the magazine, putting to rest the capacity debate. Sight configuration was imperative — the Titan has rugged HD night sights that are moved forward and recessed deep into the slide, yielding target accuracy and extreme durability. Securing the pistol to your hand are custom G10 grips, 25-LPI checkering and snake-scale serrations on the slide, keeping the Titan planted in the harshest of conditions. The combination of its all-steel frame, bull barrel and tactical rail gives the Titan balance and durability, resulting in the most formidable target-grade combat handgun on the market.

CAL: 10mm Auto **FINISH:** Matte black

DW **HAVOC**

The Havoc is designed to be the most well-balanced, softest-shooting Open gun on the market. Built on an all-steel, high-capacity version of the 1911 frame, it is fitted with industry-leading parts including a barrel and compensator that combine the highest level of accuracy with the most effective compensation available. The C-MORE® red dot allows for extremely fast target acquisition with its ultra-low mounting configuration. The Havoc is a handgun made for shooters by shooters, ready to dominate Open IPSC/USPSA® division.

CAL: 9mm Luger, .38 Super **FINISH:** Matte black

Limited Availability — The Dan Wesson Elite series typically sells out in the first few months of the year. Lead times of 6 months can be expected on these limited-production models.

CZ-USA
Rifles

CZ **RIMFIRES**

CZ **455**

The CZ 455 sets a new standard for affordable rimfire bolt guns. Drawing from a long lineage of Czech rifles, the 455 uses the same cold-hammer-forged barrels that enables CZ to dominate competitions across the nation. The 455 platform uses an interchangeable barrel system, where a user can swap from one chambering to another quickly and easily. Additionally, actions can be swapped into any 455 stock without modifications. This means a 455 FS in .22LR can be converted into a Varmint Precision Trainer with the addition of a stock and a barrel kit. Five minutes and the included tools are all it takes to do the swap. It's the ultimate bolt-action rimfire platform.

CZ 455
FEATURES

- Action fully machined from bar stock
- Trigger adjustable for weight of pull
- Cold-hammer-forged barrel
- Detachable magazine
- Standard 11mm dovetail milled into receiver
- Interchangeable barrels
- Interchangeable stocks

The rimfire rifles produced by Česká Zbrojovka Uherský Brod are among the most sought-after firearms in the world.

Check out our website for the latest developments in the CZ 455 product line.

CZ **455 AMERICAN SYNTHETIC SUPPRESSOR-READY**

Perfect for quiet plinking, the 455 American Suppressor-Ready has a 16.5" barrel that is threaded at the factory to fit muzzle devices and suppressors with 1/2"x28 threads. Its black synthetic stock has a soft-touch finish and is patterned in the American style with a high, flat comb intended for use with a scope.

CAL: .22 LR **STOCK/FINISH:** Synthetic/blue

MODEL VARIANTS:

- CZ **455 American Synthetic** — 20.5" sporter barrel, .22 LR
- CZ **455 American Walnut** — Turkish walnut stock, 20.5" sporter barrel, .22 LR, .17 HMR and .22 WMR

CZ **455 AMERICAN COMBO (SWITCH BARREL SET)**

The 455 American is also available in a money-saving set that includes barrels in both .22 LR and .17 HMR as well as the tools, parts and magazines to convert the rifle back and forth between the two calibers.

CAL: .22 LR and .17 HMR **STOCK/FINISH:** Walnut/blue

Additional barrel kits for the 455 are available in our webstore at shop.cz-usa.com.

CZ **452 AMERICAN LEFT-HAND**

(LIMITED PRODUCTION)

Though most models of the 452 have transitioned to the 455 platform, the left-hand version of the American is one that continues to be made on the 452 action. CZ 452 barrels are traditionally mounted, threaded into the action, so they don't have the 455's ability to swap to different chamberings.

CAL: .22 LR, .17 HMR **STOCK/FINISH:** Walnut/blue

CZ **455 VARMINT**

Our heavy-barreled version of the 455, the Varmint has a .866" cylindrical barrel. Not only does the heavy barrel make for good harmonics, it also allows the Varmint to perform well with a wide variety of rimfire loads, translating into an accurate platform for shooting targets or getting game. The Turkish walnut stock has an American-style comb for use with a scope and a wide, flat forend that rides a sandbag well.

CAL: .22 LR, .17 HMR, .22 WMR **STOCK/FINISH:** Walnut/blue

scope not included

CZ **455 VARMINT THUMBHOLE FLUTED**

The 455 Varmint Thumbhole is one classy rifle. A nutmeg-colored laminate, its stock is impressively ergonomic. The unique barrel uses the .866" profile of our 455 Varmint barrels but is heavily fluted to take some weight out. While the heat-shedding ability of a fluted barrel isn't as important in a .22LR, it definitely makes for a good-looking rifle.

CAL: .22 LR **STOCK/FINISH:** Nutmeg laminate/blue

NEW

CZ **455 VARMINT EVOLUTION®**

The Evolution® stock has proven very popular on our 455 Varmint platform. Though the bolt is on the right-hand side, the stock design is fully ambidextrous including the cheekpiece, teardrop pistol grip and palm swell. The extreme free float provided by the Evolution® stock design ensures that there's no chance of stock-to-barrel contact, resulting in excellent harmonics. The 455 Varmint action along with the Evolution® stock will accept any of the accessory barrels available for the 455 platform including the American and Lux (open sights) as well as other varmint-weight barrels in any available caliber. A 5-round magazine is included.

CAL: .22 LR, .17 HMR **STOCK/FINISH:** Coyote laminate/blue

MODEL VARIANT:

- CZ **455 Varmint Evolution** — .22 LR or .17 HMR, pink laminate

scope not included

suppressor not included

CZ **455 VARMINT TACTICOOL SUPPRESSOR-READY**

One of our most popular 455 Varmint models, the Tacticool has a heavy 16.5" barrel threaded 1/2x28 for use with a suppressor or other muzzle device. Riding in a black-painted laminate stock, it incorporates features found on much more expensive stocks without pushing the price of the rifle through the roof. The short barrel gives plenty of time for the cartridge to get a full burn while increasing the rigidity of the barrel, resulting in a rifle that drives tacks. Quietly.

CAL: .22 LR **STOCK/FINISH:** Black painted laminate/blue

NEW

NEW

CZ **455 VARMINT PRECISION TRAINER**

The 455 Precision Trainer was designed to provide the same look and feel as a full-size tactical rifle while allowing for more economical training. While .22 LR ammo isn't as plentiful or inexpensive as it once was, the Precision Trainer has become more popular than we ever could have imagined. Its Manners Composite T4 stock provides a rock-solid platform and is finished in a three color camoflauge pattern. The stock itself has multiple layers of carbon fiber and fiberglass hand-laid in high-temperature epoxy resins, then placed in a vacuum and heat-cured to create the perfect resin-to-fabric ratio. Combined with the 455 Varmint's 20.5" long, .866" cylindrical heavy barrel, that makes the Precision Trainer a surgical paper-puncher.

CAL: .22 LR **STOCK/FINISH:** Camo Composite/blue

MODEL VARIANTS:

- CZ **455 Varmint Precision Trainer Suppressor-Ready** — 24" tapered varmint barrel, 1/2x28
- CZ **455 Varmint Precision Trainer Suppressor-Ready** — 16.5" varmint barrel, 1/2x28

CZ **455 FS**

With a timeless Mannlicher-style full-length Turkish walnut stock, the 455 FS has a following all of its own. With iron sights and a European-styled comb to match, it's built for shooting with iron sights. Using the same barrel sets as the Lux, it can be swapped between .22 LR, .22 WMR and .17 HMR in just minutes. Extra barrel sets sold in our webstore come with everything required -- including tools.

CAL: .22 LR, .22 WMR, .17 HMR **STOCK/FINISH:** Walnut/blue

Additional barrel sets available at www.shop.cz-usa.com.

CZ **455 LUX**

The 455 Lux has a Turkish walnut stock and open sights that are adjustable for windage and elevation. Like all 455s, it has an 11mm dovetail for mounting optics and can be quickly and easily swapped to a different chambering with the addition of a second barrel set (sold in our webstore). One 5-round magazine is included.

CAL: .22 LR, .22 WMR **STOCK/FINISH:** Walnut/blue

CZ **455 ULTRA LUX**

Our longest-barreled rimfire, the Ultra Lux sports a 28.6" barrel, giving it an impressive advantage when it comes to sight radius. Following in the footsteps of its predecessor, the 452 Ultra Lux, the 455 version has the same tangent rear sight, beechwood stock with cheekpiece and 10-round mag. Just like all 455s, it has the ability to swap barrels and stocks. The largest draw of the Ultra Lux has always been its incredibly long sight radius, which makes it easy to be accurate when using its crisp iron sights.

CAL: .22 LR **STOCK/FINISH:** Beechwood/blue

CZ **455 TRAINING RIFLE**

Famous for its use in rimfire competition, 455 Training Rifle shares all the same the popular features of its 452 predecessor — it has the same 24.8" barrel, tangent rear sight (adjustable for distance) and beechwood stock with Schnabel forend.

Between the long sight radius and the crisp iron sights, it's no wonder the Training Rifle has become a favorite in open-sight Rimfire Sporter competition.

The biggest difference is the ability to swap the barrel and/or stock, traits that all our 455s possess. An ideal rifle for introducing youth to the shooting sports, the Training Rifle is shipped with a 5-round magazine, but single-shot adapters and 10-round magazines are available.

CAL: .22 LR, .17 HMR **STOCK/FINISH:** Beechwood/blue

CZ **452 SCOUT**

The Scout is a compact rimfire rifle with a 12" length of pull for young shooters. Its shortened dimensions, reduced weight and single-round loading device make it a perfect first rifle for any boy or girl. The single-shot adapter helps teach ammo conservation and marksmanship. The rifle features adjustable open sights and an 11mm dovetail for mounting optics. Though it is delivered with a single-shot adapter, any of the .22 LR CZ 452/455 magazines will fit the Scout and are available separately.

CAL: .22 LR **STOCK/FINISH:** Beechwood/blue

NEW

CZ **512 AMERICAN**

Set up for optics, the 512 American has a Turkish walnut stock with laser-cut checkering. The unique semi-auto's action comprises of an aluminum alloy upper receiver, which secures the barrel and bolt assembly, and a fiberglass-reinforced polymer lower half that houses the trigger mechanism and the magazine well. The modular design is easily maintained, requiring only a coin as a tool for fieldstripping. Sharing magazines and scope rings with the CZ 455, the 512 makes the perfect companion to your bolt-action CZ rifle.

CAL: .22 LR, .22 WMR **STOCK/FINISH:** Beechwood/blue

NEW

CZ **512 CARBINE**

Built to be a compact, handy rifle, the 512 Carbine shines as a utility rifle on a farm or ranch. With a short 16.5" barrel threaded 1/2x28 and a hardy beechwood stock, it's ideal for dispatching predators and varmints. Its iron sights are superb, with a tangent rear adjustable for distance and a fiber optic front for great visibility. Both .22 LR and .22 WMR versions ship with an extended 10-round magazine.

CAL: .22 LR, .22 WMR **STOCK/FINISH:** Black dyed beechwood/blue

CZ **512 TACTICAL**

Built as a tactical trainer, the 512 Tactical is dropped into an aluminum chassis with 6-position adjustable stock. A monolithic Picatinny rail makes mounting optics a cinch. With extended magazine capacities, the .22 WMR version holds 10 rounds while the .22 LR holds 25. Its short 16.5" barrel is threaded for a suppressor.

CAL: .22 LR, .22 WMR **STOCK/FINISH:** Polymer and aluminum/blue

CZ **512 SEMI-AUTO**

The standard iron-sighted version of the CZ 512, this model is the one that gave birth to all the other variants inthe 512 line. One of the only affordable and reliable semi-auto .22 WMR rifles on the market, it has built a reputation as a tack-driver owing to its cold hammer forged barrel and crisp fully-adjustable iron sights.

CAL: .22 LR, .22 WMR **STOCK/FINISH:** Beechwood/blue

CZ **527**

The smallest of our centerfire platforms, the CZ 527 has proven popular the world over. In Europe, it has won more awards in the “light rifle” category than any other rifle. Ever.

Designed specifically for small-base centerfire calibers, it is a true micro-length Mauser action. With controlled round feed, a detachable single-stack magazine, a cold-hammer-forged barrel, integral 16mm dovetails and our renowned single set trigger, many people think it’s the ultimate small-caliber platform.

With such a small action, even longer-barreled Varmint models seem short and quick-handling. Whether you need a varmint chambering such as .17 Hornet or .204 Ruger or want to plink with steel-cased ammo in .223 Rem. or 7.62x39, we’ve got a 527 for the job.

CZ 527
FEATURES

- True micro-length Mauser-style action
- Controlled round feed
- Hammer-forged barrel
- Single set trigger
- Detachable magazine
- 16mm scope dovetails milled into the action
- Left-hand versions available in select calibers
- Because they are built to CIP spec, all CZ .223s are built to fire 5.56 ammunition. CIP spec doesn’t differentiate between the two.

CZ **527 AMERICAN**

The CZ 527 American features a classic American pattern stock, a sporter-weight hammer-forged barrel, a single set trigger and a recessed target crown. Made to be used with optics, this rifle ships with 1" steel scope rings. Since 2015, all CZs in .223 Rem. ship with a 1:9" twist barrel for most bullets up to 70 grains.

CAL: .17 Hornet, .22 Hornet, .221 Fireball, .222 Rem., .223 Rem., .204 Ruger
STOCK/FINISH: Walnut/blue

MODEL VARIANT:
- CZ 527 **American Left-Hand** — .223 Rem. or .204 Ruger

CZ **527 M1 AMERICAN SYNTHETIC**

The M1 improves on the aesthetics and ergonomics of the 527 American with a redesigned triggerguard and flush-fit 3-round detachable magazine. Its black synthetic stock ensures that it can take use and abuse in the field. Ships with a set of 1" scope rings.

CAL: .223 Rem. **STOCK/FINISH:** Synthetic/blue

CZ **527 VARMINT THUMBHOLE**

Ideal for varmint hunting, the 527 Varmint combines all the features that have made this micro-mauser a favorite with a heavy profile varmint barrel. Fit in a Boyd's thumbole laminate stock in Shady Camo colors, it is an incredibly ergonomic rifle for extended sessions behind the trigger.

The Varmint retains all of the features that made the 527 famous, from its controlled round feed and claw extractor to its single set trigger and cold hammer-forged barrel. Scope mounts are milled directly into the top of the forged, square bridge receiver (rings not included), and the rifle comes with a 5-round detachable box magazine.

CAL: .223 Rem. **STOCK/FINISH:** Shady Camo Laminate/matte blue

MODEL VARIANT:
- CZ 527 **Varmint** — Turkish walnut stock, .17 Hornet, .17 Rem., .204 Ruger, .223 Rem.

1" and 30mm rings available at shop.cz-usa.com

CZ **527 CARBINE**

The Carbine is an intermediate-range 'brush gun.' Weighing in at less than 6 lbs, this handy rifle has a straight comb walnut stock and open sights. Our most popular model chambered in 7.62x39, it combines low recoil with effectiveness on medium-sized game such as deer and wild boar, making it ideal for beginning hunters. Both chamberings offered in the Carbine are economical to shoot given their service rifle heritage and the availability of surplus ammunition.

Built to CIP specifications, our 7.62x39 chambers are ideal for shooting steel-cased surplus ammo. Designed to shoot .311 bullets, some American brass ammo may not perform as well as the imported steel-cased variety because of SAAMI brass dimensions and varying bullet diameters.

CAL: .223 Rem., 7.62x39 **STOCK/FINISH:** Walnut/blue

CZ **527 YOUTH CARBINE**

Our incredibly popular 527 Carbine now has a youth variant. Though the action and barrel stay the same, the Turkish walnut stock has been shrunk in nearly every dimension. With a 12.75" length of pull, smaller pistol grip with tighter radius and thinner forend, the Youth Carbine makes an ideal first deer rifle. Chambered in .223 and 7.62x39, both cartridges are more than capable of taking deer-sized game and deliver little felt recoil compared with many youth offerings on the market. Paired with our smooth micro-Mauser action and single set trigger, a standard Carbine stock can be added as the shooter grows, so its small size won't relegate it to the back of the safe a few years down the road.

CAL: .223 Rem., 7.62x39 **STOCK/FINISH:** Walnut/blue

CZ **527 FS**

Brimming with style, the FS rides in a classy Mannlicher-style full-length stock. Its European-style hog-back stock is ideal for use with the crisp iron sights, though a scope can easily be affixed to the integral 16mm dovetails found on all 527s.

Between the classic lines, the single set trigger and the smooth micro-mauser action, the 527 FS is a rifle to make your friends and family envious.

CAL: .223 Rem. **STOCK/FINISH:** Walnut/blue

THE CZ **SINGLE SET TRIGGER** SYSTEM

A lifetime of hunting will expose you to a multitude of situations. You will be presented with fleeting opportunities that require a quick shot, and when hunting dangerous game you must be prepared for the life-or-death shot to stop a charge. On the other hand, most shots will give you the opportunity to shoot from a more stable position such as a rest, shooting sticks or a practiced kneeling or prone position. The CZ single set trigger (SST) system provides the shooter with the options to effectively handle any shooting situation they are presented with.

The SST allows for both a standard hunting trigger and a light target trigger in the same rifle. By operating the rifle in the same manner as any other bolt action, the trigger is in the "standard" mode with the heavier of the two trigger pulls. By simply pushing the trigger forward until it "clicks," the crisp and light target trigger mode is set. The standard trigger is adjustable for weight, creep and overtravel. The set trigger function is only adjustable for weight but always breaks like glass. Many shooters will tell you that the single set trigger is a better aid to accuracy than a $1,000 scope.

A: Standard trigger pull weight
B: Creep
C: Overtravel
D: Set trigger pull weight

CZ SST "Perfect Pull" Trigger Adjustment

DISCLAIMER: Do not attempt trigger adjustments unless you are confident in your ability to follow instructions for adjustments and safe operation.

Tools required: 6mm wrench, 7mm wrench, one very small and one large common flathead screwdriver

- Make sure the magazine and chamber are empty.
- Remove the stock from the barreled action.
- Cock the rifle, then adjust screw "B" in until it fires and back off ¼ turn.
- Loosen locking nut, and remove screw "C" to allow easy access to screw "A."
- Adjust screw "A" to desired poundage, and tighten the lock nut (ensuring that the screw position does not change).
- Replace screw "C," turn it all the way in, then back it out while pulling the trigger until it fires. Then back out an additional ¼ turn and tighten the lock nut for screw "C" (ensuring that the screw position does not change).

Set Trigger Adjustment and Operation
To adjust the set trigger weight, adjust screw "D" in to lighten and out to make heavier. If you prefer to completely disable the set function, turn screw "D" all the way in until the rifle fires, then back off ¼ turn.

This process will get you very close to the best trigger pull possible with only slight adjustments needed, if any, to get it to the "Perfect Pull" for you.

An activated set trigger is very sensitive to shock and during handling could unintentionally discharge if the set trigger is adjusted with too little travel. The safety of the SST adjustment can be checked with the rifle unloaded by repeated opening and closing of the bolt combined with moving of the safety to its "ON" and "OFF" positions in both set and unset modes. If the set trigger adjustment (engagement screw "D") is too light, it will go off when doing this. In this case, add more travel to the set trigger adjustment until it does not simultaneously go off.

For safety, activate the set trigger only after the rifle is loaded and when in position for the shot with the safety in the off position. Do not carry your rifle with an activated set trigger! If you have activated the set trigger and you do not immediately take the shot, keep your firearm pointed in a safe direction and activate the safety, then squeeze the trigger to deactivate the set feature.

CZ **527 LUX**

The CZ 527 Lux has won more awards in the light rifle category in Europe than any other rifle — ever! Fitted with a Turkish walnut stock in the famous Bavarian pattern, the Lux is ideal for open-sight shooting, and the hooded front sight allows for a glare-free, crisp sight picture. Ships with a 5-round single-stack magazine.

CAL: .22 Hornet, .222 Rem., .223 Rem. **STOCK/FINISH:** Walnut/blue

MODEL VARIANT:

- CZ 527 **Lux Left-Hand** — .223 Rem.

557 CENTERFIRE

CZ's newest centerfire offering, the 557 is a departure from the Mauser-style bolt found on CZ's 550 models. Instead, it has a short extractor and plunger-style ejector for smooth operation and enhanced ejection. The short extractor or "push feed" system also makes it easier to single load the rifle, which many shooters prefer for range work.

The new receiver is machined from steel billet and has CZ's integral 19mm dovetails for mounting a scope. Equipped with a 2-position safety, the bolt can be cycled while the rifle is on "Safe." To top it off, it comes with a fully adjustable trigger that allows the owner to tune weight, creep and overtravel to his liking.

Clad in an American-style walnut stock, the new action is paired with CZ's legendary cold-hammer-forged, factory-lapped barrel. The resulting rifle is destined to become a treasured hunting companion.

scope not included

CZ **557 SPORTER**

The long action version of the 557, this rifle is chambered in some of the most popular American cartridges — the .270 Win. and .30-06, as well as the ever-popular European staple, the 6.5x55 Swede. A good combination of weight and handling, the Sporter's short, stiff 20.5" barrel may sacrifice a few FPS to longer barrels, but the resulting harmonics make it a tack driver. The short overall length makes it easy to carry slung over the shoulder or slipped into a pack. It's American-styled stock has laser-cut checkering and a cheekpiece, and is cut from Turkish walnut.

CAL: 6.5x55, .270 Win., .30-06 **STOCK/FINISH:** Turkish walnut/blue

scope not included

CZ **557 SPORTER MANNERS**

Manners Composite Stocks are the pinnacle in modern stock making, combining the latest in carbon fiber with countless hours behind the trigger, resulting in ergonomic stocks of extreme strength and stiffness that deliver on accuracy and weight savings. An MCS Elite Hunter stock at heart, the 557's Manners platform consists of a 100 percent carbon fiber shell, the right combination of both light- and high-density fills and aluminum bedding pillars.

CAL: 6.5x55, .270 Win., .30-06 **STOCK/FINISH:** Manners/blue

scope not included

NEW

CZ **557 SPORTER SHORT ACTION**

Built specifically to house .308-sized cartridges, the 557 Short Action also features a detachable box magazine. With less overall action length, this variant of the 557 is more compact and a little lighter, making it ideal for hunting medium game. With the same CNCed billet action and our legendary cold hammer forged barrel, the 557 is a rifle that won't just last a lifetime, it'll get handed down for generations.

CAL: .243 Win., .308 Win. **STOCK/FINISH:** Turkish walnut/blue

scope not included

CZ **557 SPORTER SYNTHETIC**

With a high parallel comb, full grip and a soft-touch rubberized finish, the Synthetic version of the 557 is a rugged package at an affordable price. The combination of the cold hammer-forged barrel and stiff polymer stock make for repeatable accuracy.

CAL: .270 Win., 6.5x55, .30-'06 **STOCK/FINISH:** Synthetic/blue

CZ **557 CARBINE**

The 557 Carbine model combines the quick handling characteristics of a shorter-barreled rifle with the benefits of backup iron sights. This is the preferred configuration of many professional hunters, since a damaged scope can be removed and the rifle is still useable. With a fiber optic front sight (adjustable for height) and a sturdy rear blade (adjustable for windage), it also has 19mm dovetails milled into the top of the action.

CAL: .270 Win., 6.5x55, .30-'06 **STOCK/FINISH:** Turkish walnut/blue

scope not included

NEW

CZ **557 VARMINT**

Building on the incredibly precise 557 short action, the Varmint model adds a stout 25.6" barrel in a heavy profile that tapers to a 0.863" muzzle. Anchored in a newly-designed walnut stock, it has a healthy palm swell, laser-cut stippling and a flat forend. With ergonomics as the guiding principle in the stock's development, the result is an incredibly comfortable rifle to lay behind, whether you're punching paper, ringing steel or knocking off prairie dogs at great distances.

CAL: .308 Win. **STOCK/FINISH:** Turkish walnut/blue

CZ 557
FEATURES

- Push feed action
- Square bridge receiver
- Cold-hammer-forged barrel
- Barrel lapped for accuracy
- Integral 19mm scope bases
- Adjustable trigger

550 CENTERFIRE

Our classic Mauser-style rifle, the 550 operates on controlled-round-feed. More involved than a push-feed action, as the cartridge feeds up out of the magazine it is grasped firmly by the massive claw extractor of the bolt. Secured fast to the front of the bolt, the cartridge is inserted into the chamber and drawn back as the bolt is cycled, always controlled by the boltface.

What this means for the shooter is that when the adrenaline is flowing, there's no opportunity to short-shuck the action, a situation where a push-feed would eject the spent shell but not pick up a fresh one. For this reason, controlled-round-feed is the action of choice for Professional Hunters and those who need their rifle to function flawlessly when stress is high.

CZ **550 FS**

The 550 FS is fitted with a classic Bavarian-style Mannlicher stock with a muzzle cap. While the aesthetics of this model might remind us of rifles from times gone by, its short 20.6" barrel, fast-handling stock and iron sights are ideal for the quick shots required while hunting in dense cover.

Unique to the 550 FS and Composite Carbine models is the three-position safety. Fully rearward is "safe," fully forward is ready to fire, but the middle position allows the bolt to be cycled for unloading while remaining on "safe."

CAL: .270 Win., 6.5x55 SE, .30-'06 Sprg., 9.3x62 (fixed magazine)
CAL: .243 Win, .308 Win. (detachable magazine)
STOCK/FINISH: Turkish walnut/blue

CZ **550 COMPOSITE CARBINE**

The 550 Carbine is a versatile platform that adapts easily to the variety of hunting methods and locations the traveling hunter is exposed to when pursuing species across the globe. With its 20.6" barrel, it is compact enough to easily maneuver in a blind or hop out of a safari vehicle. The American-pattern Aramid composite stock is ultra stable, with a full-length aluminum bedding block.

While it is designed to be used primarily with optics, it is equipped with adjustable backup iron sights as well. If the scope should be damaged, you find yourself in thick cover or are hunting close, fast-moving game, the short sight radius of the 20.6" barrel helps you get on target quickly.

Unique to the 550 FS and Composite Carbine models is the three-position safety. Fully rearward is "safe," fully forward is ready to fire, but the middle position allows the bolt to be cycled for unloading while remaining on "safe."

CZ **550 ULTIMATE HUNTING RIFLE**

The CZ Ultimate Hunting Rifle (UHR) is a CZ 550-based rifle in .300 Winchester Magnum that comes in at 8 lbs and includes a minute-of-angle accuracy guarantee to 600 yards. By maintaining quality-control standards unheard of in the industry, the UHR delivers a level of accuracy formerly only available from high-end custom rifle gunsmiths.

The UHR allows the hunter to realize the full potential of the components in its rifle system. By guaranteeing that the rifle itself is very accurate, the only variables left in the system are the optics, ammo and ability of the hunter. Keeping in mind that the UHR is the foundation of a shooting system capable of extreme precision, a new scope-mounting system is included that matches the abilities of the rifle. Machined from a single piece of aluminum with rings for 30mm scope tubes, it provides solid and precise attachment. When combined with quality ammunition, optics and practice, the UHR can significantly extend a shooter's effective range.

The UHR is also an excellent complement to a safari hunter's dangerous-game gun, allowing surgical shot placement on plains game. From Impala to Wildebeest, the Ultimate Hunting Rifle is up to the task.

WESTERN SERIES

Each rifle in the Western Series is built by hand here in the USA. Starting with bare actions from our Czech factory, our custom gunsmiths fit a premium US-made barrel and drop them into one of two hardy stocks to ensure that they'll not only survive that hunt of a lifetime, but they'll continue to drive tacks after making it up the mountain. Whether you need the long range knock-down power of the .338 Lapua or the extreme durability of the nitrocarburized Sonoran, the Western Series rifles are uniquely ready to take on demands that other hunting rifles can't handle.

So from the plains of Australia to the hardscrabble mountains of British Columbia, our Western Series rifles are purpose-built to tackle the most demanding hunts nature can provide.

CZ **550 BADLANDS**

Energy — and a lot of it. It's a real asset when taking big game such as elk and bison at longer distances. Our new Badlands is the ideal rifle for the job. As a hunting round, the .338 Lapua delivers incredible energy at normal ranges, with more than enough to do the job at extended distances. At 800 yards, the 300-grain hunting load still carries over 2,000 ft/lbs of energy, more than enough for any North American game.

This long-range hunting rifle is anchored in an Aramid composite-reinforced stock with a full-length aluminum bedding block. Threaded to the end of the premium 25" medium-weight barrel is a custom muzzlebrake that both tames the recoil and directs the blast forward.

Hunting from a distance where elevation adjustments are measured in minutes of angle or milliradians requires a good relationship between hunter and rifle, meaning time behind the trigger is a must. Our goal was to have a high-energy hunting rifle that wouldn't punish the shooter but still had what it takes to connect when the time comes. The confidence of knowing you own those "way out there" shots makes everything else just that much better.

CAL: .338 Lapua **STOCK/FINISH:** Aramid composite/blue

CZ **550 SONORAN**

The rifle that inspired the Western Series, the Sonoran is ideal for stalking mulies through a desert valley or taking elk across a canyon. Built to be more of a long-range tackdriver than a mountain rifle, the Sonoran still comes in at under 8 lbs, thanks to its Manners 100 percent carbon fiber stock and fluted barrel.

Meant to take a licking, the Sonoran is ferritic nitrocarburized inside and out, meaning this rifle is near impervious to wear as well as corrosion. Not only does the surface treatment bring the hardness up to a Rockwell of 72, it also increases lubricity, meaning a little oil keeps the Sonoran running smooth as butter. Clad in its olive drab carbon fiber stock, it's the rifle built to weather the toughest hunts on the planet.

Magnum chamberings wear a fluted, 26" barrel in a #4 contour, while non-magnums have a 24" #3. Besides its extreme corrosion and wear resistance, this surface treatment more than doubles the barrel's expected life. When combined with the right ammo and a good scope/mount combination, the Sonoran is guaranteed to shoot 1 MOA or better.

CAL: .30-'06, .270 Win., 7mm Rem. Mag., .300 Win. Mag., .26 Nosler **STOCK/FINISH:** OD Green Manners Carbon Fiber/black nitride

CZ **550 AMERICAN SAFARI MAGNUM ARAMID COMPOSITE**

The American model retains the quality and reliability of the original CZ 550 Safari Magnum, along with all of the features that make a CZ the perfect choice for dangerous game. The ASM has the same controlled-feed action, hammer-forged barrel and 3-leaf express sights, but it is fitted into a straight-comb stock designed for use with optics.

The ASM is available in Field- or Fancy-grade walnut as well as a premium composite stock made with Aramid composite-reinforced fiberglass and a full-length aluminum bedding block for the ultimate in strength and stability. Designed and built to handle any condition imaginable from Alaska to Africa, it's as tough as you are.

LEFT HAND — The CZ 550 American Safari Magnum in .375 H&H Magnum is available in left-hand configuration.

Note — Order the Warne Quick Detatch rings for proper fit on the LH model.

CAL: .375 H&H Mag., .458 Win. Mag., .416 Rigby, .458 Lott, .505 Gibbs **STOCK/FINISH:** Aramid composite/blue

MODEL VARIANTS:

- CZ 550 **American Safari Magnum Walnut Field Grade**
- CZ 550 **American Safari Magnum Walnut Field Grade** — .375 H&H, Left-Handed

CZ **550 SAFARI MAGNUM**

Known worldwide as the 602 Brno, the CZ 550 Safari Magnum is a true full-size magnum, not a smaller action blown out to barely hold the cartridge. The rifle of choice for most Professional Hunters in Africa, odds are that the rifle backing you up on a dangerous game hunt was made by CZ.

Features include 3-leaf express sights (1 standing, 2 folding), hammer-forged barrel and single set trigger. The stock is made from select Turkish walnut and has a classic safari shape. The controlled round feed and fixed ejector make this rifle reliable enough for heavy and dangerous game, while the reasonable heft helps tame the recoil.

CAL: .375 H&H Mag., .458 Win. Mag., .416 Rigby **STOCK/FINISH:** Field-grade walnut/blue

SAFARI CLASSICS

SAFARI CLASSICS CUSTOM-GRADE RIFLES **FEATURES**

- CZ 550 Magnum action with two-position positive safety
- Single set trigger set up to your specifications
- Glossy blue or matte blue finish on metal parts
- No. 1 Fancy-grade walnut stock with straight comb and dual crossbolts
- Barrel band with sling attachment

All Safari Classics rifles are hand-built to order, call 1-800-955-4486 x341 for options and pricing.

SAFARI CLASSICS **MAGNUM EXPRESS RIFLE**

The Safari Classics line from CZ-USA features the CZ single set trigger system set up to your specifications; matte or gloss blue finish on metal parts; #1 Fancy-grade American walnut stock with dual crossbolts and straight comb, glass bedded to the individual action; and a barrel band sling mount. The Magnum Express can be chambered in cartridges from .338 Lapua all the way up to .550 Magnum.

The rifles chambered in .505 Gibbs and .500 Jeffery include a mercury recoil reducer installed in the stock as well. We have also added several optional upgrades that you can add at the time you place your order. They include bolt jewelling, a muzzlebrake, ebony forend tip, rust or satin blue finish, weather-resistant coating and more. Please see the order form download for more info or contact the Safari Classics Custom Shop at info@safariclassics.com, (800) 955-4486 x338 or (913) 321-2251 x338.

SAFARI CLASSICS **EXPRESS RIFLE**

The Express Rifle is designed for cartridges that fit standard-length actions for the hunter who wants the same features and handling as their dangerous game rifle in a plains rifle, as well as those of us who believe in the carry-all-day, shoot-once philosophy of recoil management.

Available in (but not limited to) .425 Westley Richards, .416 Ruger, .416 Taylor, .375 Ruger, 9.3x62, .338 Win. Mag., .300 Win. Mag., .30-'06 and .270 Win.

POP-UP PEEP SIGHT

The coveted pop-up peep sight (at one time an option on the Brno 602, predecessor of the CZ 550 Safari Magnum) is now an option available from the Safari Classics Custom Shop. The pop-up peep fits in a recess machined into the rear bridge of the receiver. When retracted, the peep sight does not interfere with the use of a scope, nor does it hinder the speed of the express sights. With the press of a button, the spring-loaded sight snaps into position, allowing for more precise aiming than provided by express sights. Of course, it is always available as a backup should your scope fail as well. — $330 (installed)

Craig Boddington *Signature Series*

Safari Classics **Craig Boddington Signature Series .375 H&H**

When Craig Boddington first went on safari in Africa the Brno 602 (predecessor of the CZ 550 Safari Magnum) was already well-established among Africa's professional hunters. Today, it is the most popular dangerous-game rifle with African PHs. Craig's experience with the CZ 550 Safari Magnum includes more than just his own hunts, including one instance where poachers were caught with a badly abused but still functional model shooting reloads stuffed with scavenged powder from AK47 rounds and recovered solids, hammered back to round-ish. The decision to put his name on the CZ 550 was an easy one.

His limited-edition signature series rifle starts out with a CZ 550 Magnum action chambered in .375 Holland & Holland. A few custom touches are included to make this rifle suit Craig's personal preferences. The barrel has been shortened slightly to 24", and an upgraded Safari Classics front sight and barrelband forward sling swivel stud have been installed on it. The stock has been redesigned for this series with input from Craig and fellow "Petersen's Hunting TV" host Kevin Steele. The new stock is more trim and lively in the hand with a thin wrist and a slimmer, shallower, shorter forend. The 13.5" length of pull is terminated by a red, 1" Decelerator® recoil pad fitted to the XX Claro walnut stock. (The pictured Field-grade stock was the only sample available at the time this catalog went to print.)

Limited-edition upgrades on the metalwork include a jeweled bolt and Craig's signature engraved on the floorplate as well as the "Craig Boddington Series" designation engraved just forward of the action on the top of the barrel.

Also included in the package are a few of Craig's favorite safari accessories: a canvas sling and cartridge slide from Trader Keith and a leather-bound hunting journal to record the memories of the hunt.

This is a Limited Edition of 50 pieces including 45 right-hand models and 5 left-hand models.

CAL: .375 H&H **STOCK/FINISH:** XX Claro walnut/rust blue finish

Shotguns

PUMP ACTION

CZ **612 FIELD**

Simple, strong and smooth, the 612 Field is designed to shoot everything from targets to turkeys. Wearing a walnut stock and satin blued finish on its 28" barrel, this rugged pump will hunt for generations to come. Chambered for 2¾ and 3" shells and supplied with three chokes, it's the hardest-working shotgun in our line.

CZ **620 YOUTH**

The 620 Youth is designed for both kids and adults — the size, shape and gauge appeal to the kids, and the price tag appeals to their parents. Perfect for the new hunter in the family, this lightweight 20 gauge is a simple, safe and reliable gun for youngsters. Like all of our pumps, it has a crossbolt safety behind the trigger. Featuring a reduced-length buttstock and a 24" barrel for easy handling, it shoots 2¾ and 3" shells and comes complete with a set of three choke tubes.

CZ **620 BIG GAME**

Whether you prefer the fast-handling, hard-hitting characteristics of a slug-shooting pump gun for deer or the state game department made that choice for you, it's hard to beat the CZ 620 Big Game. A cantilever rail comes mounted to its 22-inch smoothbore barrel, making it ideal for a low-power scope or red dot. The extended rifled choke enhances the performance of rifled slugs, giving it deadly accuracy.

NEW

Need choke tubes?
From single chokes to an end-all-be-all 16-choke kit, head over to **shop.cz-usa.com.**

CZ **612 MAGNUM TURKEY**

The 612 Magnum Turkey was created for the turkey woods. This pump gun comes equipped with two chokes, one extra-full to deliver maximum pellets to the kill zone and one modified for upland hunting and steel shot. Make sure you don't take your eyes off of it, as you just might lose it in the spring foliage.

Available in 12 gauge with a 3½" chamber and a 26" barrel, the Magnum Turkey is hydrodipped in Realtree Xtra® Green.

CZ **612 MAGNUM WATERFOWL**

Built for the goose blind, the 612 Magnum Waterfowl boasts the perfect waterfowl camo pattern combined with a 3½" chamber for magnum shotshells. This machine is the best tool for making big birds fall from the sky. The 612 Magnum Waterfowl ships with 5 extended black choke tubes.

Available in 12 gauge with a 3½" chamber and a 28" barrel, the Magnum Waterfowl is hydrodipped in Realtree MAX-4® camo.

The **712** and **912** were used to set a new World Record in 2015 — the 'Most Sporting Clays Targets Broken in One Hour,' breaking 3653 targets. That's more than one target a second for an hour straight!

CZ **712 G2**

The CZ 712 is our tried-and-true gas-operated semi-automatic that enabled CZ-USA's David Miller to set a new world record, breaking 3653 clays in 1 hour. Built on a lightweight alloy receiver, it accepts 2¾ and 3" shells and is an all-arounder, a great choice for upland game, waterfowl or clays. The barrel on the 712 is chrome-lined and has a matte black hard chrome exterior that will resist corrosion for many seasons in the field. Fit with a Turkish walnut stock, the G2 version adds new laser-engraved checkering, right-hand palm swell as well as a barrel lock ring to make assembly easier.

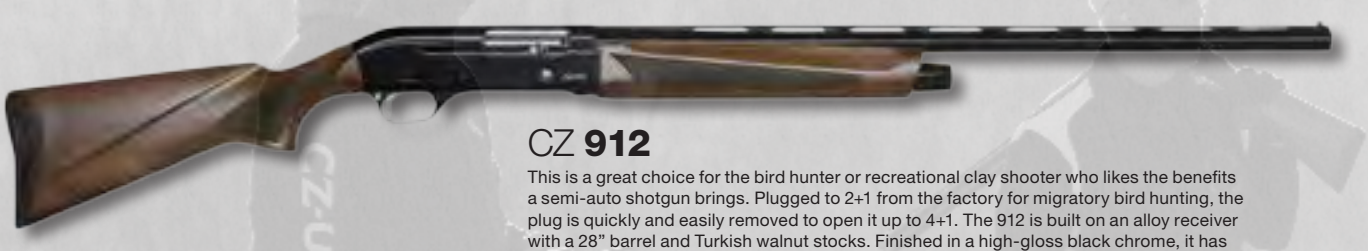
MODEL VARIANT:

- CZ **720 G2** — 20 gauge, 26" barrel
- CZ **720 Reduced Length G2** — 20 gauge, 24" barrel, 13" length of pull NEW

NEW

CZ **712 GREEN G2**

Adding a little color to the mix, this 712 has the same World Record-setting reliability as its black predecessor, but with a green anodized receiver. With the same laser-cut checkering, healthy palm swell and smooth gas operating system, it's sure to please at the range or in the field. With a capacity of 4+1 (and a plug to reduce that to 2+1), the 712 Green ships with 5 flush choke tubes.

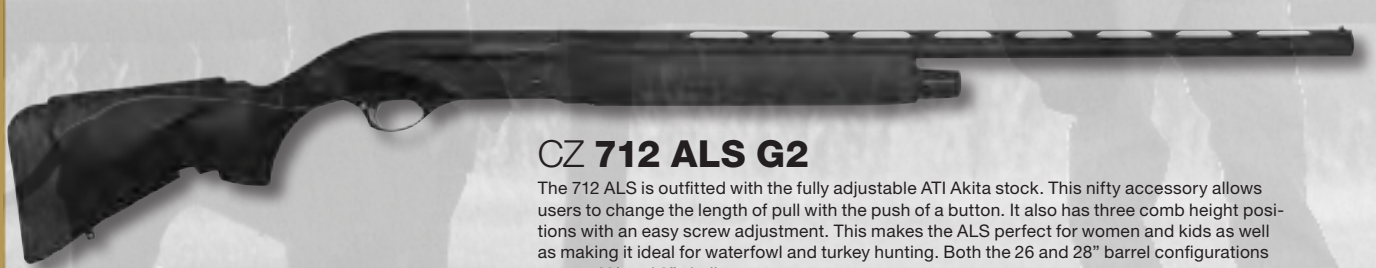


CZ **912**

This is a great choice for the bird hunter or recreational clay shooter who likes the benefits a semi-auto shotgun brings. Plugged to 2+1 from the factory for migratory bird hunting, the plug is quickly and easily removed to open it up to 4+1. The 912 is built on an alloy receiver with a 28" barrel and Turkish walnut stocks. Finished in a high-gloss black chrome, it has some more modern lines running through the action and stock. The action's mechanism differs from our 712, with its return spring located in the buttstock rather than over the magazine tube, making the magazine tube and gas system much easier to clean. This machine is designed to shoot standard field loads all the way up to 3" magnum hunting loads.

MODEL VARIANT:

- CZ **920** — 20 gauge, 28" barrel



CZ **712 ALS G2**

The 712 ALS is outfitted with the fully adjustable ATI Akita stock. This nifty accessory allows users to change the length of pull with the push of a button. It also has three comb height positions with an easy screw adjustment. This makes the ALS perfect for women and kids as well as making it ideal for waterfowl and turkey hunting. Both the 26 and 28" barrel configurations accept 2¾ and 3" shells.

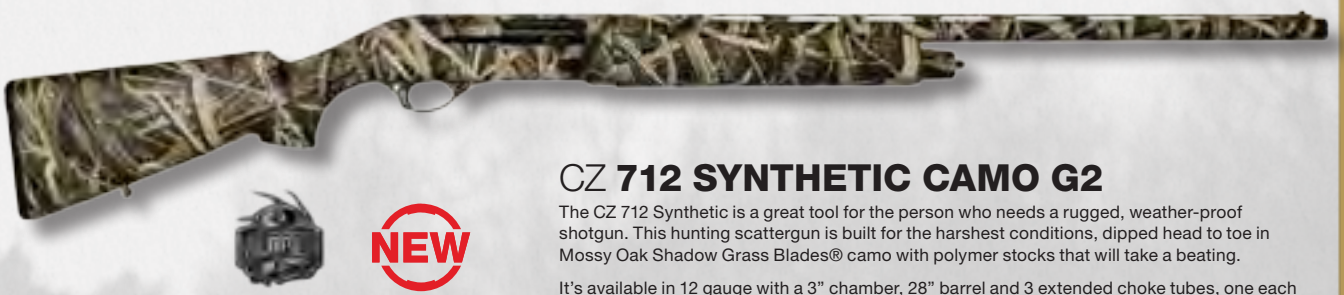
MODEL VARIANT:

- CZ 720 **ALS** — 20 gauge, 24" barrel

NEW

CZ **712 3-GUN G2**

Using input from competitors in the growing sport of 3-Gun, this 712 is set to be the perfect entry-level shotgun for the game. An extended bolt handle and oversized bolt release make manipulating the action easier than ever, and the ATI fluted magazine extension bumps capacity up to 9+1 and extends just past the 22" barrel to help protect the muzzle. The 712 3-Gun ships with three extended black choke tubes.



NEW

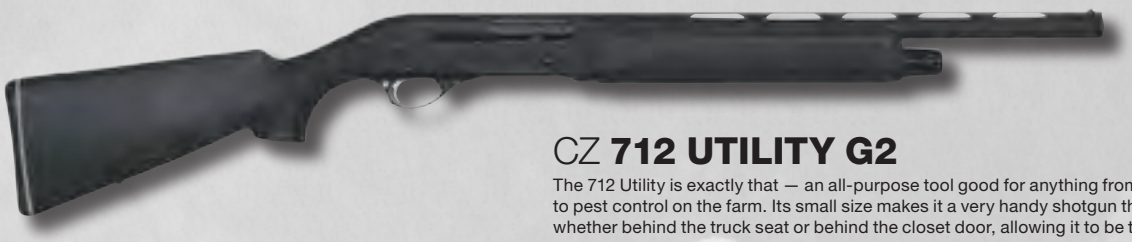
CZ **712 SYNTHETIC CAMO G2**

The CZ 712 Synthetic is a great tool for the person who needs a rugged, weather-proof shotgun. This hunting scattergun is built for the harshest conditions, dipped head to toe in Mossy Oak Shadow Grass Blades® camo with polymer stocks that will take a beating.

It's available in 12 gauge with a 3" chamber, 28" barrel and 3 extended choke tubes, one each for close, medium and long shots.

MODEL VARIANT:

- CZ 712 **Synthetic G2** — Black finish, 5 flush chokes



CZ **712 UTILITY G2**

The 712 Utility is exactly that — an all-purpose tool good for anything from home protection to pest control on the farm. Its small size makes it a very handy shotgun that is easy to stash, whether behind the truck seat or behind the closet door, allowing it to be there when you have to have it.

CZ SEMI-AUTO **FEATURES**

- Gas operated (712 & 912)
- Shoot both 2¾ & 3" shells
- 4+1 capacity (9+1 for 3-Gun)
- Barrel lengths: 20, 22, 24, 26, 28 and 30"
- Chrome-lined bore
- .730 bore diameter on 12-gauge models
- .620 bore diameter on 20-gauge models
- 8mm-wide rib (10mm on 712 Target)
- Interchangeable choke tubes
- Turkish walnut stocks
- 13, 14½, 14¾" walnut stock configurations in addition to adjustable length ALS models
- Rubber recoil pad with snag-free heel
- Cast-off for the right-handed shooter (except ALS, Utility, 3-Gun and Synthetic models)
- 5-year limited warranty

CZ **ALL-AMERICAN TRAP COMBO**
(BOTH UNSINGLE WITH ADJUSTABLE RIB AND STANDARD BARREL SETS)

Built specifically for ATA shooters who compete in both trap singles and doubles and want one gun to do it all, the All-American Trap Combo is the tool for the game! It ships with two barrel sets -- one a single-shot 'un-single' with a dial-adjustable aluminum rib (adjustable from 50/50 up to 90/10 point of impact), the other a standard set of barrels with stepped rib (50/50 point of impact).

To ward off corrosion, the CNC milled action is surface hardened, resulting in a beautiful white metal finish that resembles brushed stainless. The inner workings resemble those on shotguns much higher in price, with firing pins that ride in bushings and replaceable locking blocks for when the gun starts to loosen up after heavy use.

With an adjustable parallel comb, competiton trigger and auto ejectors, this set is ready to dominate the trap field.

NEW

The All-American Trap Combo comes in a custom lockable aluminum case from Americase®.

CZ **SUPER SCROLL COMBO SET**
(20-GAUGE & 28-GAUGE BARRELS/FORENDS)

The Super Scroll Combo Set is a unique package intended for the hunter or sporting clays shooter who wants to carry an absolutely gorgeous shotgun. This 20- and 28-gauge combo includes 30" barrels and forends for each gauge. Ornate hand-engraved scrollwork adorns the receiver, faux sideplates, triggerguard and monoblock. Built on a 20-gauge frame and action, both barrel sets are equipped with ejectors. This highly engraved work of art comes standard with five chokes per gauge and a full grip, making it an excellent crossover gun between clay and feather.

Ships in a custom-fit aluminum case from Americase®.

COMPETITION

Sporter G2 | Sporter Standard Grade G2 | Redhead Premier Target | Sharp-Tail Target

CZ **SPORTER G2**

The Sporter in Grade 3 wood is one of CZ's most beautiful guns. It builds upon the Standard Grade with an intricate hand-engraved receiver with deep relief scrollwork and upgraded wood furniture. It has the same deep black chrome finish, tuned triggers and Monte Carlo sporting stock, making it both beautiful and absolutely deadly on clays. Available with 30 or 32" barrels, it also ships with a set of 6 Kicks stainless steel extended choke tubes. Sporters feature a full forend, laser-cut checkering and 1-piece CNCed receiver.

CZ **SPORTER STANDARD GRADE G2**

The Sporter Standard Grade is designed specifically with the sporting clays enthusiast in mind. It features the same single selectable trigger system found in the Redhead, tuned to break crisply at 4 to 5 lbs. Fitted with a Grade 2 Monte Carlo sporting stock with adjustable comb and a right-hand palm swell, it offers sporting clays competitors everything they need in a competition gun. It is available with 30 or 32" barrel configurations and ships with a set of 6 Kicks stainless steel extended choke tubes. The Sporter Standard Grade features a full forend, laser-cut checkering and 1-piece CNCed receiver.

CZ **REDHEAD PREMIER TARGET**

The Redhead Premier Target is assembled like the standard Redhead Premier but with a different purpose in mind. This over/under has been designed to crush clay targets, plain and simple! It comes fitted with a special Monte Carlo stock that keeps the gun on your shoulder while keeping your head up to see the clays. Add to that a healthy right-hand palm swell, 30" barrels and a stepped rib designed for rising trap targets — it's the perfect choice for those wanting to own a true target gun at an affordable price. Shipped with a set of 6 Kicks stainless steel extended choke tubes, the Redhead Target has laser-cut checkering and a 1-piece CNCed receiver.

CZ **SHARP-TAIL TARGET**

This new target side-by-side carries all of the mechanics as the Sharp-Tail but with a 30" barrel and a 14¾" length of pull. Originally designed to tackle side-by-side sporting clays events, it is a classy double gun that doesn't carry the accustomed weighty price tag. Equipped with a set of 6 Kicks stainless steel choke tubes, it's the perfect choice for a clay shooter or gentleman hunter.

Many of our break-open competition guns ship with a special set of Kicks stainless steel choke tubes. Designed by professional sporting clays shooter Tom Mack, they have an easy-to-use constriction system. One ring is for close targets, two for medium targets and three for long targets. Constrictions are Skeet (0.005"), Light Modified (0.015") and Improved Modified (0.025"), respectively.

CZ **612 TRAP**

There once was a time when pump-action shotguns ruled the American Trap field. The combination of simplicity, reliability and price made it ideal for the sport. This very special pump-action shotgun features a 32" ported barrel with a set of extended choke tubes, a high ventilated target rib, a parallel comb on a walnut Monte Carlo stock, a gold trigger, a dual action bar and a smooth operating system with a spring-loaded ejector. Carrying every feature the hardcore clay shooter looks for in a competition shotgun, it's not just for the trap market, it's also great for sporting clays pump events — just ask our CZ-USA shooting team members! Tom Mack used one to win the 2014 NSCA National Championship pump division and Dave Miller claimed the Missouri State Championship main event with this smooth-running pump.

CZ **712 TARGET G2**

The 712 Target is built for the trap field and is a perfect choice for the price-conscious shooter. It also makes a great starter gun for new shooters. This 30" 712 is equipped with a larger target-style stock that provides a comfortable fit. When combined with the soft-operating gas system, it makes recoil almost nonexistent.

612 Trap **712 Target G2**

OVER/UNDER

CZ-USA is proud to offer these beautifully hand-crafted shotguns — they are a wonderful combination of Old World craftsmanship and modern technology. Actions milled by CNC machines are hand-engraved and fit into their Turkish Walnut stocks. The barrels are chrome-lined and have a durable black chrome exterior finish, making them much more rust-resistant than blued barrels. Affordable and reliable, these are shotguns that are happiest when in the field or busting clays.

NEW

CZ **DRAKE**

A new addition to our over/under lineup, the Drake is built to be the best bang for the buck going when it comes to over/under shotguns. Using the same CNCed action and internals as our other shotguns, the Drake features extractor operation, single selectable trigger, mid-rib delete and laser-cut checkering. Available in 12 and 20 gauges with 28" barrels, the Drake ships with a set of 5 interchangeable chokes.

NEW

CZ **REDHEAD PREMIER**

The flagship of our over/under line, the tried-and-true Redhead also gets our new 1-piece CNCed receiver. In addition, it gets the same laser-cut checkering, solid mid-ribs, pistol grip and a classy white bead. The Redhead Premier is a true all-purpose shotgun; it's just as comfortable to shoot at a sporting clays event as it is when chasing chukhar in the mountains. With a silver receiver and ejectors that kick out the spent shells automatically, the Redhead Premier is packed with features that can't be found on another shotgun in its price range.

Available in 12 and 20 gauges with auto ejectors and 28 and .410 with extractors, single selectable trigger, 28" barrels, Turkish walnut stocks, and 5 flush-mount choke tubes, all inside a hard plastic case.

MODEL VARIANT:

- CZ **Redhead Premier Reduced Length** — 20 gauge with 24" barrels and 13" length of pull

CZ **WINGSHOOTER ELITE**

Replacing our elegant Wingshooter is the Wingshooter Elite. Built on our new CNCed 1-piece receiver, the Elite's sideplates are fully hand-engraved, reminiscent of our custom-grade Super Scroll. It carries all of the best features in our over/under line, with a single selectable trigger, solid mid-ribs, ejectors and a two-tone chromed finish. Add to that laser-cut checkering, a pistol-grip stock and a white bead, and it's hard to find a classier-looking shotgun for the money.

Available in 12 and 20 gauges with 3" chambers, selectable 28" barrels, Turkish walnut stocks, independent auto ejectors and 5 flush-mount choke tubes, all inside a hard plastic case.

OVER/UNDER **FEATURES**

- Mechanical selective trigger
- Box lock frame design
- Coil-operated hammers
- Ejector & extractor models
- 2¾ & 3" chambers
- 8mm & 10mm* ribs available
- Chrome-lined bores
- Turkish walnut stock
- 18-lines-per-inch hand checkering
- Smooth, round heel
- 14½ & 14¾"* length of pull depending on model
- 5 interchangeable flush-mount chokes
- 5-year limited warranty
- Detailed hand engraving

* Competition models only

CZ **UPLAND ULTRALIGHT GREEN**

NEW

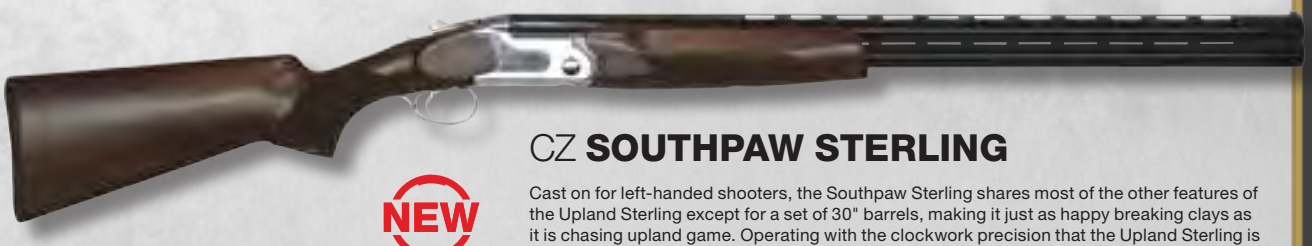
Adding a bit of character to our workhorse bird gun, the Upland Ultralight Green gets a splash of color in its anodized green receiver. All the same great features of the Upland Ultralight, including 5 interchangeable chokes, laser-cut checkering and mid-rib delete. The big news is that this green variant is chambered in 12 or 20 gauge, meaning that 20 gauge will tip the scales at a mere 5.8 lbs.

CZ **UPLAND ULTRALIGHT**

Our lightest 12 gauge over/under, the Upland Ultralight combines an aluminum receiver with some unique features to keep the weight down. With a thin 6mm top rib, mid-rib delete and hollowed-out butt stock, the Ultralight averages 6 lbs. The first of our over/under receivers to be fully CNCed, it has a reputation for reliability and consistency, and because of its light weight, it's ideal for long days canvasing Kansas milo fields. The metal surfaces are finished in a matte chrome, giving it a rugged, weather-resistant finish that is non-reflective. One of the most attractive figures is the Ultralight's price, meaning it's also light on the pocketbook.

CZ **UPLAND STERLING**

The Upland Sterling is built on a new platform featuring a CNC-milled steel receiver – resulting in mechanical components that operate with clockwork precision and consistency. This classy over/under is unique in its modern look and finish combined with classic design. The Turkish walnut stock features a stippled grip area on the wrist and forend rather than the traditional checkering. It is available in 12 gauge with a 28" barrel.



CZ **SOUTHPAW STERLING**

NEW

Cast on for left-handed shooters, the Southpaw Sterling shares most of the other features of the Upland Sterling except for a set of 30" barrels, making it just as happy breaking clays as it is chasing upland game. Operating with the clockwork precision that the Upland Sterling is known for, this gun comes with 5 flush-mount choke tubes, a mechanical trigger and safety with selectable barrels.

Available in 12 gauge with a 3" chamber, 30" barrels, ejectors, cast on stock 1/4 at the heel and 7/16 at the toe, with a regular right-handed top lever latch, all inside a plastic case.

CZ **LADY STERLING**

NEW

Finally, a shotgun fit for a lady! As the product photo demonstrates, the dimensions required to properly fit female shooters look very different from the stock designs found on most shotguns. The Lady Sterling's special stock dimensions allow most women to keep their head up and eyes on target, while the adjustable comb helps fine-tune the fit. Increased pitch makes it much more comfortable (around 8°). This classy shotgun is built on the Upland Sterling receiver and carries a single extractor rather than individual ejectors. Chambered in 12 gauge with 28" barrels, it handles both 2¾ and 3" shells.

CZ **SHARP-TAIL**

An evolution of our wildly popular Ringneck, the Sharp-Tail is an entirely new action. Much smaller overall, it features coil springs instead of leaf springs and sports the same color case-hardened finish. With a single selectable mechanical trigger and pistol grip, the Sharp-Tail is one the sharpest-looking side-by-sides on the market and has some important features. The one-piece CNCed receiver has independent floating firing pins, coil-spring-operated hammers and redesigned sears, all equating to longer life and greater consistency.

Available in 12, 20, 28 and .410 with single selectable 28" barrel, Turkish walnut stocks, single extractor and 5 flush choke tubes, all inside a plastic case.

CZ **HAMMER CLASSIC**

A modern incarnation of the fowling piece of old, the Hammer Classic has fully-functional hammers and long 30-inch barrels. Built to handle modern loads, both hammer models have a true side lock frame design and 3" chambers. Dual triggers and color case hardening round out the look, and flush interchangeable chokes lend modern functionality.

CZ **HAMMER COACH**

The shorty version of the Hammer Classic, the Coach is popular with Cowboy Action shooters who want a period-correct firearm that can handle modern loads. With fully-functional hammers and dual triggers, short 20-inch barrels, color case hardening and cylinder bore barrels, the Hammer Coach will dish out birdshot, buckshot or slugs, take your pick.

SIDE-BY-SIDE **FEATURES**

- Mechanical selective trigger
- Box lock frame design
- Extractors
- 2¾ & 3" chambers
- 8mm rib
- Chrome-lined bores
- Turkish walnut stock
- Smooth, round heel
- Cast off for the right-handed shooter
- 5 interchangeable chokes (except Hammer Coach)
- Detailed hand engraving
- Beautiful color-case-hardened receivers
- 5-year limited warranty
